Technical Skills

- **Programming:** Java, Python, JavaScript
- **Frameworks:** Django, Spring Boot, Node.js, React.js
- **DevOps/Automation:** Docker, Kubernetes, Terraform, Ansible, Git, Jenkins, CI/CD
- **Monitoring:** Prometheus, Grafana
- **Databases:** MySQL, PostgreSQL, Oracle, MongoDB
- **Other:** Linux, Bash, Agile/Scrum, Technical Documentation

Professional Experience

Software Developer | Nokia, Ottawa, ON | Sept. 2024- Dec. 2025

- Automated Cluster virtualization workflow using Ansible, reducing provisioning and cloning time by 60%.
- Built end-to-end automation to scale clusters by configuring new nodes and deploying CEPH storage.
- Developed monitoring dashboards and alerting using Prometheus and Grafana, improving observability and incident response.
- Implemented automation tools for Linux hosts to streamline daily operations and reduce manual overhead.
- Refactored core codebases to improve structure and reduce duplication by 20%, enhancing maintainability.

Business Analyst | AZADEA Group, Beirut, Lebanon | Mar. 2021- Oct. 2022

- Automated reporting processes and built KPI dashboards to support data-driven business decisions.
- Improved inventory forecasting accuracy by 50% using analytics and process optimization.

IT Specialist | AZADEA Group, Beirut, Lebanon | Sept. 2013- Feb. 2021

- Designed and deployed IT infrastructure across 90+ retail locations, ensuring operational reliability and high availability.
- Administered Windows and Linux servers, performing routine maintenance, patching, user management, and security hardening.
- Led large-scale infrastructure rollouts (network upgrades, POS migrations, system replacements) across multiple brands with minimal downtime.
- Provided technical leadership during incidents, performing root-cause analysis and preventing recurring issues.
- Supported business-critical applications (ERP, POS, inventory systems), troubleshooting integrations and improving system reliability.
- Coordinated with vendors and cross-functional teams to deploy new systems, negotiate hardware/software contracts, and plan IT budgets for Lebanon operations.

Field Network Engineer | Orange Business Services, Beirut, Lebanon | Nov. 2011- Aug. 2013

- Configured and troubleshooted Cisco-based networks for enterprise clients.
- Resolved routing and switching issues to improve network stability and performance.

Education

- **Computer Programming Diploma, 2023 - 2025.** Algonquin College, Ottawa, ON.
- **BS - Information Technology and Computing, 2007-2011.** Arab Open University - Beirut, Lebanon.

Certificates

- AWS Solution Architect - Associate (SAA-C03) [Certified](#) – Oct 2025
- AWS Developer Associate – [Certified](#) – Dec 2025
- Google Data Analytics Professional - [Certified](#) – June 2023
- Advanced Project Management, York University – Mar 2023
- AWS CloudOps Associate – **In Progress**
- Certified Kubernetes Administrator (CKA) – **In Progress**
