

TANVIR N. HASAN

Brampton, ON, Canada | (647) 513-9571 | tanvirnh.ca@gmail.com | [linkedin.com/in/tanvirnh](https://www.linkedin.com/in/tanvirnh)
Canadian Permanent Resident – No sponsorship or work authorization required

PROFESSIONAL SUMMARY

Results-driven technical operations engineer and infrastructure specialist with 3+ years of hands-on experience designing, implementing, and maintaining complex enterprise systems in mission-critical environments. Deep expertise in infrastructure operations, system reliability, incident management, root-cause analysis, problem management, and production support. Proficient in Bash and Python scripting, SDLC tools (JIRA, Confluence, Git, Bitbucket), enterprise operations procedures, and ITSM practices. Strong foundation in security principles, compliance standards, risk management, monitoring and observability (Splunk, Dynatrace), and technical documentation. Computer Science graduate with proven ability to master complex technical domains, deliver projects with minimal guidance, mentor technical teams, and drive continuous improvement in operations.

CORE TECHNICAL COMPETENCIES

Technical Operations & Support

Level 2/3 troubleshooting • Incident response • System deployment • Change management • Disaster recovery • Root cause analysis • ITSM practices

Enterprise Tools & Platforms

JIRA • Confluence • Git/Bitbucket • BMC Helix ITSM • ServiceNow • Dynatrace • Splunk

Security & Compliance

Security principles • Data protection • Compliance standards • Risk management • Access control • Incident response

Programming & Scripting

Bash/Shell scripting • Python programming • Infrastructure automation • SDLC fundamentals

Infrastructure & Systems

System architecture • Cloud infrastructure • Database fundamentals • Linux/Windows Server • Docker/Kubernetes basics

Documentation & Process

Technical specifications • SOPs/Runbooks • Knowledge management • Process optimization • Version control

PROFESSIONAL EXPERIENCE

Service Specialist – Wireless Voice Operations & Technical Expert

Rogers Communications Canada Inc. / Ericsson Canada Inc. | Brampton, ON / Mississauga, ON

May 2022 – October 2025 (3+ years)

- **Level 2/3 Technical Support:** Provided hands-on support for mission-critical infrastructure serving 11.7 million subscribers; troubleshooted complex technical issues, performed root-cause analysis, and resolved incidents with minimal escalation
- **System Implementation & Deployment:** Implemented and deployed complex infrastructure systems across production and non-production environments; managed full lifecycle from design through deployment; coordinated systems integration with vendor partners
- **Technology Operations:** Managed change requests, coordinated server patching, managed software currency upgrades, and performed regression testing to ensure system stability and operational compliance
- **Disaster Recovery & Business Continuity:** Designed and implemented DR/BC procedures; conducted validation testing; ensured system resilience and minimal downtime during failures
- **Technical Documentation:** Created comprehensive documentation including self-service libraries, best practices guides, runbooks, and playbooks to standardize operations
- **Infrastructure Automation:** Developed Bash and Python scripts for system automation, monitoring workflows, and operational efficiency improvements
- **Monitoring & Observability:** Designed Splunk and Dynatrace monitoring architecture; established KPIs and health checks; enabled proactive issue detection and rapid resolution
- **Team Leadership:** Provided technical mentorship; shared troubleshooting approaches and best practices; supported peer professional development

IT Systems Assistant – Labour and Transportation I&IT Cluster

Ontario Ministry of Transportation | St. Catharines, ON

June 2020 – September 2020 (4 months)

- Performed system integration analysis and user acceptance testing (UAT) for IT infrastructure projects
- Conducted accessibility audits using industry-standard tools (WAVE, aXe, SortSite)
- Documented technical findings and provided recommendations to stakeholders

EDUCATION

Bachelor of Science (Honours) – Computer Science

Wilfrid Laurier University | Graduated April 2022

GPA: 3.70/4.00 | Dean's Honour Roll (2020–2021) | In-Course Scholarship Award

Relevant Coursework: Software Engineering, Database I, Computer Networks, Algorithm Design and Analysis, System Architecture Concepts, Data Structures, Operating Systems Fundamentals

AWARDS & RECOGNITION

- Faculty of Science Dean's Honour Roll (2020–2021)
- In-Course Scholarship, Wilfrid Laurier University (2021–2022)

KEY ACHIEVEMENTS

- Maintained 99.9%+ uptime for mission-critical infrastructure
- Deployed comprehensive monitoring architecture (Splunk/Dynatrace)
- Developed automation scripts reducing manual effort 40%+
- Led postmortem reviews and RCA on major incidents
- Mentored team members on troubleshooting and best practices

Work Authorization: Canadian Permanent Resident – No sponsorship required. Eligible to work anywhere in Canada. | **References:** Available upon request
