PROFILE

Data Engineer with 4 years of experience building ETL pipelines, APIs, and data warehousing solutions, leveraging Python, SQL, and cloud platforms such as AWS and Oracle.

SKILLS

SQL, Python, Shell, Git, Data Modelling, Warehousing and Datalakes, AWS (EC2, Lambda, API Gateway, Redshift, Athena, Glue, Quicksight, S3), Oracle Cloud, Pyspark, ETL, ADW, Databricks, Apache Spark, Snowflake, Azure, Great Expectations, Docker, Jenkins, REST APIs, AutoSys, Tableau, Machine Learning, Agile, JIRA

PROFESSIONAL EXPERIENCE

Data Engineer, TVS Credit Services 04/2022 – 08/2025 | Chennai, India

- Spearheaded development of **60+** ML pipelines for SQL extraction, transformation, and loading, including pipelines to predict loan leads and risks (data cleaning, transformation, model training, and data warehousing), reduced runtime of several SQL scripts via optimization by **70%**.
- Designed end-to-end live APIs with **150,000+ hits/month** using AWS Lambda and Docker.
- Deployed and scheduled pipelines using AWS Glue and OCI Jobs, automated an OSM routing workflow on AWS EC2 integrated with Oracle Jobs.
- Created and maintained SQL scripts to extract and ingest data from **12** vendors, dashboards, and internal tables into data warehouses via ETL pipelines.
- Built monitoring dashboards in AWS Quicksight and Oracle Cloud, designed reporting and monitoring tables for APIs/ML models, and reduced SPICE ingestion costs by **40%** using segmented **monthly** Athena tables.
- On-boarded and cross-trained new and existing staff in Python, SQL, AWS and Oracle Cloud Technologies.

Data Engineer, Blackbuck Insights LLC 01/2021 – 03/2022 | Chennai, India

- Managed CI/CD pipelines and databases to deliver projects on time for **international clients**.
- Streamlined development processes using Shell scripts, AutoSys, Python, and Jenkins, improving project efficiency.
- Developed a tool to automate and log Git Tag creation to track productivity.
- Built tools that cut QA report comparison time from **21 hours to 4** and simplified production code tagging, boosting productivity.

EDUCATION

Professional PGP in Data Science & Engineering, 2021
Great Lakes Institute of Management

Bachelor of Technology in Electrical and Electronics Engineering, 2016 – 2020 | Chennai, India
SRM Institute of Science and Technology 

12th Grade, National Public School 2016 | Chennai, India

LANGUAGES

English — Native/Bilingual

French — Basic

PROJECTS

Sentiment Analysis of Amazon Reviews : 2021

- Developed a sentiment analysis model achieving **85% accuracy** to improve understanding of customer feedback.
- Applied data preprocessing and NLP techniques to clean, analyze, and interpret review text.

Condition Monitoring of Wind Energy Systems using Machine Learning : 2020

Simulated wind turbine operating modes and used machine learning to predict turbine performance states.
