## Technical Skills

---

**Languages:** TypeScript, JavaScript, Java, Python, SQL, Shell Scripting, CRON

**Technology:** React, NextJS, NodeJS, NestJS, Spring Boot, GraphQL, Flask, MongoDB, MySQL, Postgres, Mastra

**Tools:** Git, GitHub Actions, Docker, Linux, AWS, NGINX, Stripe

## Work Experience

---

### Full Stack AI Engineer

Nov 2025 – Present

*Playgrnd*

*Toronto, Ontario*

- Spearheaded an **Agentic AI** workflow using **Mastra**, **TypeScript**, and **Next.js**, deploying **2 custom agents** to automate **98%** of manual tasks and increase counterparty profits by **35%**.
- Architected a scalable backend schema using **Prisma** and **PostgreSQL** across **6 services**, utilizing advanced **prompt engineering** and **model tuning** to optimize classification workflows and data persistence.

### Software Engineer

Dec 2024 – Oct 2025

*FIYGE Research Inc*

*Toronto, Ontario*

- Migrated **Chrome Extension** from V1 to V2, mapping over **300 APIs** to automate webform workflows and reduce completion time by **70%**.
- Developed **QueryGen** using **Pinecone**, **Hugging Face**, and **FastAPI** to vectorize over **500 tables**, improving retrieval accuracy by **60%**.
- Configured **NGINX** and implemented **cache-bursting** for FIYGE service, reducing latency from **78s** to **22s**.
- Integrated **Spring Data JPA** with **MySQL** and optimized high-traffic queries using **connection pooling** and **batch writes**, reducing database load by **30%**.
- Built a Plaid banking service in **Spring Boot**, enhanced with scheduled data sync via **CRON** for faster updates.
- Architected and deployed **12+** reusable CRM components in React, using Selenium and GitHub Actions for continuous integration, resulting in a 35% reduction in integration errors.

### Computer Science Mentor

Feb 2024 – Apr 2024

*University of Waterloo*

*Waterloo, Ontario*

- Co-designed an **NLP solution** for the City of Kitchener green initiatives, leveraging topic modeling and sentiment analysis to increase community participation by 40%.
- Devoted 3 hours weekly to mentoring **12** freshman students in coding practices, enhancing debugging skills by **20%**.

### Software Engineer L2

Aug 2021 – Apr 2023

*Maruti Techlabs*

*Ahmedabad, India*

- Engineered solutions for **3** major products across Hybrid Chatbots, B2B, and Healthcare domains, collectively valued at over **US\$800,000**.
- Led migration to **serverless ingest pipelines**, improving system reliability and reducing downtime by **28%**.
- Developed a mailbox microservice, integrating **25+** email capabilities for Google and Microsoft accounts using the **Nylas SDK**.
- Implemented CI/CD pipelines with **GitHub Actions** for containerization and deployment on **AWS EC2**, while securing credentials with **AWS Secrets Manager**.

### Associate Software Engineer

Dec 2020 – Jul 2021

*Arastu Systems Inc*

*Ahmedabad, India*

- Automated database backups using scheduled **CRON** jobs.
- Created **15+** MySQL stored procedures and **3** triggers to support workflow automation.
- Independently built **11** Angular components using **AdminLTE** and integrated them with **Node APIs** to extend dashboard functionality.

## Education

---

### Conestoga College

Kitchener, Ontario

*Graduate Certificate - Web Development*

*Sep 2023 – Dec 2024*

### Dharmsinh Desai University

Nadiad, India

*Bachelor of Engineering - Computer Engineering*

*Aug 2018 – May 2021*
