PROFESSIONAL OVERVIEW

IT professionals with over 18 years of **10 years on-site experience** specializing in Enterprise Application with a strong focus on IBM App Connect and relevant integration tools. Proven expertise in designing, developing, and deploying integration solutions. Seeking an integration solution role / Analyst role to leverage my integration/Prod support expertise in delivering innovative, scalable solutions and Support Applications to make sure business process is not impacted.

WORK EXPERIENCE

Technology Architect/ Production Support Tech Lead, 02/2022 to 05/2025

Cognizant Technology Solutions - Halifax, NS, CAN

- Served as SME and technical liaison between IT developers and business partners, working directly with Enterprise Architects to build solutions for new interfaces/APIs and Designed and coded for MQ, File, Timer integrations.
- In Agile model-for each sprint, gathered the full requirements and provided high level and low-level architectural solutions for each use case.
- As a Development Tech Lead being front face to client, worked with team of 3 Developers. Extensively worked in Real time and batch Applications. Hands-on troubleshooting of complex technical/Performance problems in Production. Attending IRT calls and update stakeholders about status.

Tech Lead/Production Support Tech Lead ,01/2016 to 01/2022

Cognizant Technology Solutions – Hartford, CT, USA

- As a Prod Support Tech Lead worked with team of 20+ resources in Onshore and Offshore model and Front face to clients attend IRT (Incident resolution time) calls to provide the solutions on time to avoid the blockers.
- Inform both internal and external stakeholders about issue statuses while collaborating with the business to ensure seamless handoffs and follow up to resolve issues, ensuring that adequate feedback is gathered.
- Led the design and development of member accumulators' migration for a US based health insurance client.

Programmer Analyst/Associate 02/2007 – 12/2015

Cognizant Technology Solutions – Chennai/Hyderabad - India

- Responsible for coding, testing, and developing integration solutions as a Associate and Production support was provided for an existing web application.
- Designing Message flows and WTX maps.
- Worked on developing maps, type trees, message flow using Timer nodes, as part of 837 balancing report and unit testing of the same.
- Production support was provided for an existing java web application.

ACHIEVEMENTS

Onsite - Twice Recognized at Client organization level for resolving Production issues on time and make sure there is no breakdown in process. Received Service Commitment Award.

Onsite - Outstanding Recognition at client organization for analyzing & designing to reduce performance impact on backend systems.

Offshore - Client appreciation for developing and delivering the component as expected from the US based Client.
