

MONIKA DIXIT

monikadixit4790@gmail.com

(416) 561-2771

Toronto, ON, Canada

EDUCATION

Bachelor of Engineering - Information
Technology/Computer Science

SKILLS

Testing Frameworks: Playwright, Pytest, UFT,
Cucumber-BDD, Selenium

Languages: Python, SQL, HTML, Gherkin

CI/CD: Jenkins, Gitlab CI/CD

API Testing: Postman, Playwright-API

Performance Testing: LoadRunner, JMeter

Database: SQL Server, Oracle

Methodologies: Agile and Waterfall, Scrum,
Onshore and Offshore model

Domain Expertise: Banking and Financial,
Capital Market, Payments (Swift, MT &
ISO20022), Life & Annuity Insurance, Travel and
Transport

Third Party Vendor products: Calcfocus,
Lifesys, OPAS, CargoWise One

Bug Tracking: HP Quality Center, Jira, Rally

Messaging Systems: Apache Kafka

CERTIFICATIONS

- The Complete Guide to the Global Capital
Markets

- CargoWise One certified (Operator and
Specialist)

-Scrum Foundation Professional Certificate
(SFPC)- Certiprof

- Generative AI Yellow Belt (NTT DATA internal)

- ISTQB Certified Tester

- Playwright and LoadRunner certification

- Certified in Insurance Concepts, Life and
Annuity by TCS domain academy

SUMMARY

ISTQB certified Senior QA Automation Lead with over 12 years of extensive experience in the Insurance, Banking and Travel-Transport domains. Specializing in architecting and leading Testing strategy for complex insurance and financial systems. Over the past 2-3 years, developed deep expertise in Playwright with Python, UFT for End-to-End automation, integrating robust testing practices into modern CI/CD pipelines. Seeking to leverage deep domain knowledge and automation leadership to enhance software quality and accelerate release cycles.

EXPERIENCE

NTT DATA SERVICES Feb 2023 - Present

UAT/AUTOMATION LEAD Toronto, Canada

(UAT/Automation Lead for migration project supporting client Everlake's transition of insurance products and services from Allstate)

- Leading the adoption of UFT and Playwright-based automation framework with Python, achieved 50% reduction in Regression test execution time and increasing test coverage for new life and annuity web applications.
- Integrated automated UI and API test suites into Jenkins CI/CD pipeline, enabling continuous testing for every code push.
- Collaborating directly with Product Owners and Business Analysts to translate complex insurance requirements into effective test strategies.
- Actively participating in Daily Stand-up Call, Sprint Planning and Retrospective meeting and communicate details related to QA.
- Leading and mentoring onshore/offshore Manual and Automation QA team of 5-10 members, providing technical guidance on automation best practices, python scripting and domain specific testing strategies.
- Working closely with Business Analyst, attended review sessions and provided feedback to identify gaps in early stages in requirement documents.
- Facilitating Defect Triage Meeting and update Senior Management on Risks/Issues discovered during testing.

TCS (Client: Royal Bank of Canada) Mar 2019 – Feb 2023

QA LEAD Toronto, Canada

- Led end-to-end testing for critical CDSX platform upgrade including trade input, matching, clearing and settlement to ensure seamless transition of securities transactions.

Other Info:

- Canadian citizen, don't require work visa or sponsorship
- Actively engaged in community outreach programs and service
- Hobbies: Gardening, Hiking, and Cooking

- Worked on Cash Management System (CMS): Cash reconciliation system, acquired in-depth knowledge of SWIFT payments.
- Used JIRA for creating/executing test cases and for generating the Test Execution data for weekly management reporting.
- Performed the feasibility analysis on possibility of automation for the project on need basis.

TCS (Client: DHL Malaysia) Feb 2018 - Feb 2019

QA/CargoWise One SME Kuala Lumpur, Malaysia

- Joined DHL Malaysia project as an SME of CargoWise One application.
- Responsible for testing 50 plus countries where legacy system (Ocean Freight) was rolled back and integrated with new standardized application.
- Involved in System Integrated Testing (SIT).
- Used HP ALM as centralized repository for the Functional, Regression, GUI testing and as a Defect Management tool.
- Handled the outdated legacy system (built in 70-80s) by comprehending the application and created the workflows and documentation.

TCS (Client: Athene USA)

Mar 2013 - Jan 2018

QA/Performance Engineer

Pune, India

- Gained experience in functional and performance testing of applications using LoadRunner on below Protocols (Ajax Tru client – Firefox & IE, Http/html) and JMeter.
- Identified critical business processes which caused maximum loads during peak hours for Load testing and designed a load testing suite for the application.
- Prepared performance test plan and test design suite.
- Monitored the metrics such as response times, throughput, and server resources such as CPU utilized, available bytes, and process bytes by using Load Runner Monitors.
- Worked on Annuity Product Launch team and tested all new Annuity products.
- Gained hands on experience in all stages of STLC and handling of defects throughout the Bug life cycle.
- Proficient in Oracle Policy Admin System (OPAS).
