

RICHARD LIU

Guelph, Ontario, Canada | rjliu94@gmail.com | [2262182373](tel:2262182373)

PROFILE

Systems-focused IT Analyst with 5+ years of experience supporting healthcare and enterprise environments. Strong background in infrastructure support, automation, secure data handling, and system analysis. Experienced in designing, testing, documenting, and supporting data workflows, APIs, and internal integrations across clinical and corporate systems. Proven ability to work independently, collaborate with clinical and technical stakeholders, and improve system reliability in enterprise and regulated healthcare settings.

PROFESSIONAL EXPERIENCE

Desktop Support Analyst, ATS Corporation

Aug 2022 — Aug 2024

Cambridge

- Supported enterprise infrastructure across a global environment with 12+ distribution points.
- Administered SCCM and Azure environments including application and sever deployments, updates, patching, and security configurations.
- Optimized PXE imaging workflows, reducing imaging time by 33% (30 '20 minutes per device).
- Developed PowerShell and JavaScript automation for account provisioning, password resets, LAPS, and asset lifecycle management.
- Built automated workflows using Power Automate to improve ticket prioritization, SLA adherence, and tracking.
- Improved IT ticket SLA performance from 85% to 93% through workflow and categorization improvements.
- Authored and maintained technical documentation for infrastructure changes and automation processes.

IT Support Analyst, Wellington Health Care Alliances

Aug 2019 — May 2022

Fergus

- Provided Tier 2 technical support in a healthcare environment supporting clinical and corporate systems.
- Managed deployment and lifecycle support for 1,000+ devices during hospital expansions and redevelopments.
- Automated Active Directory and O365 user provisioning using PowerShell, reducing onboarding time and access errors.
- Supported secure identity and access management processes aligned with healthcare privacy requirements.
- Collaborated with clinical staff to troubleshoot system issues impacting care delivery workflows.
- Produced clear technical documentation for system changes, procedures, and support workflows.
- Developed internal dashboards and web applications using JavaScript, C#, and SQL to display real-time operational and healthcare-related data.
- Trained and mentored a team of four support analysts.

IT Field Technician, MBT IT Services

May 2022 — Jun 2022

Mississauga

- Delivered on-site hardware, software, and networking support for municipal election operations.
- Deployed Windows imaging solutions and software, maintaining high availability under strict timelines.

Software Developer, Neutral

May 2020 — Aug 2020

Guelph

- Featured in [TechCrunch](#) and [FastCompany](#) for pioneering transparency in carbon footprints of online purchases.
- Contributed to front-end development using HTML, CSS, and JavaScript, leading to \$40K in institutional funding.
