---

## Skills

- Languages: HTML5, CSS3, JavaScript, TypeScript, C#, Php
  - Frameworks: Next.js, Expo, React Native, Tailwind CSS, ASP.NET
  - Libraries: React, Node.js
  - Databases: MySQL, PostgreSQL, MongoDB, Firebase
  - Tools: Git, GitHub, AWS Lambda, GitHub Actions
  - Non-technical: Excellent communication, teamwork, and leadership
- 

## Project Experience

Relay | [GitHub](#) | Ridesharing App for Parents Sept - Dec 2024

- Developed a React Native mobile application using Expo, ensuring a smooth cross platform experience.
- Engineered safety features including GPS live tracking, PIN verification, and AI-powered ride notifications for real-time updates and GPS.
- Utilized Git and GitHub for version control, maintaining a clean and collaborative development workflow.

FairShare | [GitHub](#) | Group Expense Management App Apr - June 2024

- Developed a web application using htmx, Bun, and Express, ensuring a lightweight yet dynamic user experience.
- Implemented receipt scanning and bill-splitting functionality using Hugging Face AI models, automating data extraction and simplifying group expenses.
- Integrated Plaid API for secure bank account connections, enabling seamless transaction tracking and expense management.

Website Analysis Report | BCIT Project Jan - Feb 2024

- Analyzed a website and outlined the possible flaws to make a report, demonstrating a great attention to detail and an understanding of the usability heuristic principles.
  - Proposed improvements to general features and SEO ranking strategies to optimize performance and enhance online visibility.
  - Communicated to the website owner using language they understand and backed up findings with evidence, which led to a thorough analysis.
- 

## Education

Diploma in Full Stack Web Development (FSWD) | BCIT May 2025

- Developed proficiency in both front-end and back-end development, enabling the creation of seamless and efficient user experiences.
