

Jaelen Wright

(289)-200-0793 | jaelen.n.wright@gmail.com | [Portfolio Website](#)

SUMMARY

A passionate full-stack and mobile developer focused on building scalable, user-friendly web and mobile applications using modern technologies like React, Flutter, Node.js, Firebase, and MongoDB.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Dart, Java, HTML, CSS, R

Frontend: React, Angular, TailwindCSS, Vite, Flutter, Svelte

Backend: Node.js, Express, Firebase Functions, PHP (WordPress), Temporal.io

Databases: MongoDB, PostgreSQL, MySQL, SQLite, Firebase

Tools: Docker, Git, Figma, WordPress, Google Analytics

EXPERIENCE

Full-Stack Developer

May 2025 – Present

Crawfty (Remote)

- Worked on multiple projects featured on [crawfty.com/portfolio](#), delivering scalable solutions across web and mobile platforms.
- Built production-ready applications leveraging React, Node.js, MongoDB, and Docker in cross-functional development cycles.
- Implemented robust APIs and frontend integrations tailored to diverse industry projects spanning e-commerce, logistics, and media.

Junior Full-Stack Developer

Nov. 2024 – May 2025

ByllKreate (Remote)

- Migrated large Angular apps to React with improved performance and maintainability.
- Rebuilt custom WordPress plugins using Svelte and integrated backend APIs for vehicle import/shipping calculators.
- Developed a multiplayer Domino game using React, Temporal.io, and custom APIs: [domino.byllkcreate.com](#).
- Contributed to mobile, web, and desktop apps using Flutter, Docker, and Firebase.
- Collaborated in sprint planning, QA reviews, and cross-functional development cycles.

Junior Developer

Jun. 2024 – Nov. 2024

XRStudios (Remote)

- Contributed to a WordPress-based courier platform, enhancing functionality and optimizing user workflows.
- Developed a litigation platform for the Jamaican government using MongoDB, React, Node.js, and custom APIs.
- Delivered scalable backend integrations and clean UI components tailored to stakeholder requirements.

EDUCATION

Ontario Tech University

Oshawa, ON

BSc (Hons) in Computer Science

Sep. 2020 – Jun. 2024

- Relevant Coursework: Data Structures, Algorithms, Web Design, Databases, Scientific Data Analysis

PROJECTS

OX Courier System | *React, Node.js, MongoDB, Express, Socket.io*

- Developed a comprehensive courier management platform for efficient delivery tracking, route optimization, and customer management.
- Built reporting and analytics features for courier operations.

CaptureLand | *React, Next.js, TypeScript, Firebase, Stripe*

- Created an innovative real estate platform that combines property photography, virtual tours, and marketing tools.
- Implemented interactive experiences to help real estate professionals showcase properties.

EnterJamaica | *React, MongoDB, TypeScript, Stripe, Google Analytics*

- Designed and built a platform to assist users in completing Jamaica's mandatory C5 immigration form.
- Implemented eSIM purchasing with Stripe and tracked engagement using Google Analytics.
