

James (Yuxun) Du

Senior Backend Engineer (Java - Spring Boot - Microservices - Cloud-Native)

Based in Canada (EST)

PROFESSIONAL SUMMARY

Senior Backend Engineer with 8+ years of experience building scalable, cloud-native, and enterprise-grade systems. Specializing in Java, Spring Boot/Spring Cloud, microservices, distributed systems, and large-scale API development. Strong hands-on Azure experience with transferable GCP knowledge. Capable of full-stack work using AI-assisted React development (GitHub Copilot).

TECHNICAL SKILLS

Backend: Java (8/11/17), Spring Boot, Spring Cloud, Hibernate, REST APIs, Microservices, Node.js

Cloud & DevOps: Azure, Docker, Kubernetes, Jenkins, CI/CD Pipelines

Frontend (AI-assisted): React, Vue.js, JavaScript

Tools: GitHub Copilot, Swagger/OpenAPI, Git, Maven

Search & Data: Solr, Elasticsearch

Databases: MySQL, Oracle, IBM DB2, SQL Server, MongoDB

PROFESSIONAL EXPERIENCE

Software Engineer - WestJet (Swoop) Airlines Ltd. (May 2022 - Oct 2025, Remote)

- Built and maintained high-availability Java microservices for airline booking, check-in, payments, and document verification.
- Designed and optimized Azure cloud-native architectures for improved reliability and scalability.
- Enhanced CI/CD automation reducing deployment time and incidents.
- Collaborated with cross-functional global teams across time zones.
- Leveraged AI-assisted development workflows to improve development speed and code quality.

Senior Software Team Lead - Beijing GUO GUO LE XUE Co., Ltd (Jul 2018 - Aug 2019)

- Architected backend platform with 100+ stable REST APIs.
- Led a team of 9 developers and QA engineers.
- Introduced Swagger/OpenAPI to improve documentation and integration quality.

Senior Software Architect - Beijing Wan Hu Liang Fang Technology Co., Ltd (Nov 2017 - Mar 2018)

- Designed microservices architecture for PBM platform.
- Delivered automated CI/CD pipelines using Docker + Jenkins.
- Implemented Node.js services enabling faster feature iteration.

Software Developer Team Lead - Beijing Mi Shu Technology Co., Ltd (May 2016 - Apr 2017)

- Led backend engineering for a 10-member development team.
- Built core backend frameworks with Spring Boot + Hibernate.
- Developed Learning Assessment System that reduced preparation time by 50%.

KEY PROJECTS

Personal Web Application (React + Java)

Delivered responsive full-stack personal site leveraging AI-assisted React component generation.

Internet Search Engine (Solr + Spring Boot)

Built a high-performance crawler scanning 3000+ pages/sec.

EDUCATION & CERTIFICATIONS

- B.Sc. in Computer Science - Xiangtan University (2021)
- Diploma in Computer Science - Zhengzhou University (2018)
- Oracle Certified Associate - Java SE 8 Programmer
