Software Developer II

Results-driven Software Developer with over five years of experience in full-cycle software development, customization, and integration of cloud-native and desktop applications using C#, Visual Basic, and the .NET Framework. Adept in object-oriented programming, SOLID principles, and developing scalable, well-structured code aligned with architecture standards. Proven expertise in SQL Server, REST API development, XML/JSON data handling, and test-driven development. Strong background in debugging, comprehensive testing, and performance optimization to ensure high code quality and seamless functionality. Experienced in technical documentation, client-facing collaboration, and remote agile teams. Passionate about delivering intuitive, high-impact software solutions that meet business and technical requirements across industries including professional services and insurance.

WORK EXPERIENCE

EarthSoft

Software Developer II

12/2023 – Present

- Designed, developed, and optimized desktop applications using C#, VB and .NET Framework to meet client specifications.
- Refactored and optimized code improving data retrieval and processing times by 50%.
- Collaborated remotely with cross-functional teams for technical support and troubleshooting, ensuring seamless software functionality for end-users.
- Led and mentored junior developers, promoting best coding practices and knowledge sharing.
- Implemented SQL-based solutions to improve data processing efficiency and ensure data integrity.

Software Developer I

12/2021 – 12/2023

- Built statistical analysis reports using VB & .NET Framework to identify anomalies in data sets.
- Took ownership of key development tasks, analyze technical specifications delivering high-quality, well-tested code within deadlines.
- Conducted code reviews and resolved software bugs, ensuring optimal application performance and reliability.

Atlantic Canada Opportunity Agency

Software Developer

10/2019 – 12/2021

- Designed automation tools using C# & .NET Framework, streamlining repayment schedules.
- Developed custom reporting tools to accelerate financial approvals for client funding applications.
- Automated data validation and approval workflows, improving business process accuracy.

EDUCATION

B.C.S. Computer Science

Carleton University

Ottawa, Canada

SKILLS

- **Languages & Frameworks:** Blazor, C#, Entity Framework Core, JSON, .NET Framework, REST API, SQL, VB, NET, WinForms, XML
- **Tools & Platforms:** Azure DevOps, Azure Logic Apps, MS SQL Server, PowerShell, Syncfusion, Visual Studio
- **Development Practices:** Code Reviews, OOP, SOLID, Test-Driven Development (TDD), Troubleshooting
