WORK EXPERIENCE

AI Trainer DataAnnotation

12/2023 - Present

Remote

- Evaluated and provided detailed feedback to improve AI model performance in mathematics and programming
- Contributed to training AI models across multiple languages, including English, Dutch, and French
- Peer-reviewed submissions from other contractors to ensure quality and consistency of training data

Embedded Software Engineering Manager Scentroid

04/2019 - 12/2023

Whitchurch-Stouffville

- Led a team of embedded software engineers and a technical support team, providing mentorship, guidance, and performance feedback
- Managed multiple concurrent projects from concept to completion
- Collaborated closely with cross-functional teams, including hardware engineers, product managers, quality assurance teams, and sales teams to define project requirements and specifications
- Collaborated with external partners and vendors to integrate third-party software components and ensure seamless system operation

Technical Customer Support Manager Scentroid

01/2022 - 12/2023

Whitchurch-Stouffville

- Led and managed a team of technical support specialists, providing coaching, training, and evaluations to drive excellence in customer service
- Developed a knowledge base of issues and solutions to improve customer self-service and reduce the need for technical support
- Led customer training sessions and provided technical support to ensure customer understanding of the product
- Collaborated with product development and engineering teams to communicate and prioritize customer feedback and feature requests
- Monitored and analyzed KPIs to identify trends, track customer satisfaction, and make data-driven decisions for process improvement
- Conducted regular team meetings and training sessions to ensure technical support staff remained current with product knowledge and troubleshooting techniques

Embedded Software Developer Scentroid

04/2018 - 04/2019

Whitchurch-Stouffville

- Developed code for interfacing with external hardware, including electrochemical gas sensors
- Developed code for collecting, processing, and visualizing data from sensors on displays and storing data on cloud servers
- Optimized code for memory and performance constraints in embedded systems
- Created low-level drivers for various peripherals, including I2C, SPI, UART
- Enhanced existing Siemens PLC code by integrating new client feature requests, resulting in improved functionality and customer satisfaction

EDUCATION

Bachelor of Science (Industrial Engineering - Electronics & IT)

KU Leuven

09/2013 - 06/2017

SKILLS

Embedded C/C++ Programming

Embedded Linux

Python

Debugging & Troubleshooting

MS Office

Firmware Development

KPI Analysis

Time Management Skills

Project Management

AI Model Training

I2C

SPI

LoRa

TCP/IP

SCL

ESP32

STM32

Data Analysis

Technical Support

Cross-Functional Collaboration

LANGUAGES

English

Native or Bilingual Proficiency

Dutch

Native or Bilingual Proficiency
