## PROFILE SUMMARY

Software Developer with 20+ years of experience specializing in Java, Python, and large-scale enterprise systems across local and multinational organizations. Strong background in object-oriented programming, web applications, microservices and relational databases. Recognized for delivering high-quality solutions in demanding environments, adopting new technologies quickly, and collaborating effectively with cross-functional teams. Fluent in English and Spanish, with working proficiency in French.

---

## TECHNICAL SKILLS

**Languages:** Java SE 24 Java EE 8, Python 3, Angular 20

**Frameworks:** Spring Boot 4, Spring 7, EJB 3.1

**Web/Microservices:** SOAP, REST, CXF, JAX-RS, JAX-WS, WSDL, XSD, XML, JSON

**SOA & Integration:** Oracle SOA Suite 12c, OSB, BPEL, composite applications

**Persistence:** Hibernate, EclipseLink, JPA 2.0, ORM

**Databases:** Oracle (9i–12c), MS SQL, Sybase, Teradata

**Messaging:** JMS

**Tools:** JMeter, PyCharm, Spring Tool Suite, Eclipse, IntelliJ, Gradle, Maven, Git

**Scripting:** UNIX/Solaris shell scripting

**Other:** Liquibase, WebLogic, Unix systems, data migration, ETL processes

---

## EDUCATION

### B.Sc. in Systems & Computation Engineering

Universidad Dominicana O&M – Santo Domingo, Dominican Republic Mar 2001 – Jul 2010

---

## PROFESSIONAL EXPERIENCE

### ***Solutions Design Specialist***

**Canadian National Railway (CN)** – Montreal, Canada

*Oct 2018 – Nov 2025*

Worked as a Java and Python backend/front-end developer for the Key Management Service (KMS), a mission-critical platform ensuring secure authentication between locomotives, rail equipment, and back-office systems. Contributed to high-availability infrastructure, cryptography-based authentication, and service reliability for rail operations across North America.

#### **Responsibilities:**

- Design, document, and implement Spring Boot web services used across CN's critical systems
- Build automated JMeter test suites and support QA in pre-production validation
- Deploy and monitor releases in production environments, ensuring continuous service availability
- Perform peer code reviews and maintain code repositories
- Manage and renew security certificates for internal and external rail partners
- Support integrations with U.S. and Canadian regulatory requirements

#### **Achievements:**

- Implemented remote key deployment, reducing manual engineering work and improving operational safety
- Delivered major enhancements enabling migration to the new train control program, including new asset and key-type definitions aligned with regulatory standards

**Tech Environment:** Java 8 EE, Spring Boot 3.2.x, Angular 19.0.0, Python 3, JMeter, REST, JAX-RS, JAX-WS, JSON, MS SQL, Oracle, Unix

---

## **Java Developer / Consultant**

**CGI** – Montreal, Canada

*Jun 2015 – Sept 2018*

### **Morgan Stanley (2017–2018)**

Consultant for the Prime Brokerage, Funding & Finance division. Migrated P&L reporting platform services from Java 6 to Java 8 while ensuring functional integrity of business-critical platforms.

#### **Responsibilities:**

- Migrate legacy web services to Java 8
- Define schemas (XSD), generate bindings, and implement business objects
- Develop unit tests and deploy to dev/test environments
- Maintain Git repositories, merges, and code reviews

**Tech Environment:** Java 8, CXF, XML, JAXB, XSD, REST, Gradle, Eclipse, Git

### **Deutsche Bank (2015–2017)**

Java consultant for the Flow Risk platform, delivering new functionalities for global trading systems.

#### **Responsibilities:**

- Back-end Java service development based on client requirements
- Create/modify database structures, stored procedures, and functions
- Resolve daily issues reported by QA and users
- Participate in technical solution sessions with architects
- Support production deployments

**Tech environment:** Java 7, WebLogic, JAXB, XSD, REST, Liquibase, Maven, Git, Sybase, Unix

---

## **Senior Java Developer / Service Architect**

**Unipago S.A.** – Santo Domingo, Dominican Republic

*Feb 2014 – May 2015*

Contributor to the nationwide Social Security, Health, and Pension platform, serving millions of users.

**Responsibilities:**

- Define service standards and create service contracts (XSD, WSDL)
- Develop Java web services and EJB components
- Design database structures and PL/SQL logic
- Build BPEL and composite applications in SOA Suite 12c
- Mentor junior developers and support QA testing cycles

**Achievements:**

- Re-engineered critical health and pension processes affecting the entire country's population

**Tech environment:** Java EE 6, Oracle SOA Suite 12c, Oracle 12c, EJB 3.1, JPA 2.0, WebLogic, XML, BPEL, Maven, Unix

---

**Systems Analyst**

**Berry Dominicana** – Santo Domingo, Dominican Republic

*Aug 2009 – Dec 2013*

Led major data migration initiatives and developed supporting web applications for digital advertising operations.

**Responsibilities:**

- Develop Java web apps for digital product operations
- Implement PL/SQL procedures and Unix scripts
- Lead ETL processes and data migration from legacy systems
- Develop tools for business intelligence and decision support

**Achievements:**

- Managed large-scale data conversion from legacy platforms
- Built supplemental applications to modernize the production ecosystem

**Tech environment:** Java EE 6, Oracle 11g, MS SQL Server, Unix, Shell Scripts, WebLogic

---

## **Systems Engineer IV**

**Claro (Verizon USA)** – Santo Domingo, Dominican Republic

*Nov 2004 – May 2009*

Developed B2B and customer-facing web services on Verizon's application portal and contributed to major platform modernization efforts.

### **Responsibilities:**

- Develop Java web applications (Struts 2, Spring, Hibernate)
- Create Solaris/Unix shell scripts and Oracle stored procedures
- Build EBonding and B2B applications
- Support migration of legacy systems to new production platforms

### **Achievements:**

- Built billing applications for Yellow Pages customers
- Developed multiple services used across Verizon's online system for status inquiries

**Tech environment:** Java EE, JMS, AJAX, XSLT, SOAP, XML, WebLogic, Oracle, Unix

---

### **Certifications**

- Oracle Certified Associate, Java SE 7 Programmer (OCAJP 7)

---

### **Additional Training**

- Oracle SOA Suite 11g: Composite Applications, BAM, OSB, Middleware, Enterprise Manager  
Oracle Education – Santo Domingo, Dominican Republic
