

Shahrzad Baghestani

Ottawa, ON, CA — ☎ 438-455-2680 — ✉ shahrzadb.dev@gmail.com —  LinkedIn —  Github

About me — Diligent, results-driven professional with a Master's in Electrical and Computer Engineering from the University of Ottawa and over 3 years of experience in software development, testing, tracking, and documentation. Exceptional collaborator skilled in delivering reliable, efficient solutions while maintaining strong relationships with teams and stakeholders. Eager to secure a challenging software engineering role in a dynamic organization to leverage my technical expertise for innovative projects and continued growth in emerging technologies.

Skills

Languages: Python, C/C++ , FastAPI, SQL, HTML, Javascript, Typescript, entry-level React, $\text{\LaTeX}$

Cloud & DevOps: Docker, Linux, entry-level AWS

Tools: Git, GitHub, Postman, VS Code, Salesforce, Jira, Confluence, Figma, Microsoft 365

Operating Systems: Windows, Linux, Mac

Other: Postgres, REST APIs, Auth0, Domain & DNS Setup

Areas of Expertise

Requirement Gathering - Data Validation - Data Visualization & Reporting - Database Management - Project Management & Delivery - Product Demos & Customer Presentations - Workflow Tracking & Documentation - Unit & Functional Testing.

Education

University Ottawa

Sep 2021 - June 2023

Master of Electrical and Computer Engineering

Iran University of Science & Technology

Sep 2016 - June 2020

Bachelor of Electrical Engineering

Status: Permanent Resident (Canada)

Certifications

- Programming Foundations: Software Testing/QA
- Test Automation Foundations
- Jira Essentials and Administration by MPT Academy
- React, NodeJS, Express & MongoDB - The MERN Fullstack
- Docker Kubernetes: The Practical Guide

Experience

Enerfrog Bussiness Services Inc.

Feb 2024 – Sep 2025

Software Engineer

Ottawa, ON

- Managed monthly utility bills and quarterly waste data by cleaning datasets, detecting anomalies, and updating the facilities database, improving data accuracy for energy reporting.
- Wrote unit testing scripts using python and enforced 80% code coverage, ensuring robust software reliability for energy reporting tools.
- Developed python automation scripts for anomaly detection in utility datasets, including unit tests that validated data integrity and reduced errors in facilities database updates.

- Optimized database schemas and API performance with SQL queries and FastAPI, incorporating integration tests to support real-time operational insights.
- Built an Energy Star calculator using FastAPI and developed Python scripts that automatically updated facility Energy Star scores each month based on incoming utility bills.
- Trained AI models and wrote Python automation to identify high-consumption facilities, helping clients reduce unnecessary energy usage across warehouses and commercial sites.
- Developed real time weather alerts and weekly work order reporting through Python, HTML, and AWS and optimized database schemas and queries to improve API performance and support real time operational insights.
- Collaborated with clients and management during early stage planning and product iteration cycles and contributed to UI design by creating customer focused website layouts in Figma while maintaining version control using Git

Entrust

June 2023 – Feb 2024

Verification Specialist

Ottawa, ON

- Answered calls and held meetings to verify customer information, ensuring accuracy, compliance, and customer satisfaction.
- Used Salesforce and CRM systems to access and verify customer information, ensuring accuracy and compliance.
- Leveraging Jira software to streamline and enhance the verification process, improving efficiency and data accuracy.
- Ensuring compliance and accuracy in customer authentication through established procedures.
- Investigating and resolving discrepancies in customer information, demonstrating problem-solving skills.

University Ottawa

Fall 2021 & Fall 2022

Teaching Assistant

Ottawa, ON

- Taught and supported students in C and C++ programming through lectures, tutorials, and structured lab assistance.
- Supervised more than 100 undergraduate students each semester and maintained clear communication regarding course expectations and academic progress.
- Guided students through programming challenges, helped them debug complex code, and improved their understanding of algorithms, data structures, and core computer science concepts.
- Provided grading, feedback, and academic support to ensure students met learning objectives and improved their technical proficiency

Novin Hi-Tech-Solutions Company

Jan 2020 – Aug 2021

WebLogic & Jira Administrator

Tehran, Iran

- Monitored and analyzed critical data for the banking application using elastic search and Kibana.
- Responded promptly to server anomalies or issues, analyzing logs with Logstash and implementing immediate fixes
- Administered WebLogic servers, managing deployments, patches, upgrades, and version migrations.
- Managed issue tracking and resolution using Jira, tracking project-related tasks and providing accurate reporting.
- Provided Jira training and guidance to management teams, ensuring proper use of the platform.
- Maintained system documentation, ensuring accurate and up-to-date records for future reference and knowledge sharing.
