Summary

Results-driven Full-Stack Software Engineer with 10 years' experience building scalable, cloud-based web applications. Strong expertise in **C#/I.NET (Framework & Core)** and modern **JavaScript frameworks (React, Angular, Vue.js)** with proficiency in **ES6+**, front-end development, responsive design, and intuitive **user interfaces**. Experienced in **Python scripting** and academic exposure to **Java**. Proven ability to deliver **secure, high-performance** solutions on **Azure**, optimize databases, and implement **CI/CD (Azure DevOps, Git)**. Skilled in **design concepts**, cross-browser compatibility, **debugging** and **bug fixing**, supporting **data-driven decisions**, and meeting **security requirements**. Collaborative Agile team player with strong verbal communication, experienced in version control (**Git**) and leveraging **AI tools (ChatGPT, GitHub Copilot)** to boost productivity and code quality.

Technical Skills

Programming Languages: C# (expert), JavaScript, ES6+, TypeScript, Python (scripting), Java (academic knowledge, transferable skills)

Frameworks & Libraries: .NET (Framework & Core), MVC, WCF, WebAPI, Entity Framework, Angular, React, Vue.js, Nuxt.js, Dojo, Node.js, WebPack

Databases: SQL Server, Oracle, MySQL (Complex Queries, Stored Procedures, Optimization)

Cloud Platforms: Azure (App Services, Functions, Data Storage)

DevOps & Tools: Azure DevOps, Git, TFS, SVN, CI/CD pipelines, AI-assisted tools (ChatGPT, GitHub Copilot)

Design & Architecture: MVC, Layered Architecture, Business Logic Layer, RESTful APIs

Methodologies: Agile (Scrum), DevOps practices

Professional Experience

Feb 2024 - Jul 2025: Software Engineer | Cardcom (Credit Clearance for Businesses)

- Rebuilt and modernized the client-side architecture using C# (.NET MVC WebAPI) and React 18, improving performance by 25%.
- Designed and implemented scalable Azure-based solutions, enhancing system reliability and reducing infrastructure costs by 15%.
- Optimized SQL Server queries and implemented Entity Framework, reducing query execution time by 40%.
- Collaborated in Agile teams to ensure continuous integration and delivery using Git and TFS.
- Actively used **AI tools (ChatGPT, GitHub Copilot)** for code generation, unit tests, and documentation

Apr 2021 – Feb 2024: Software Engineer | Phoenix (Leading Insurance Company)

- Designed and developed backend workflows for insurance claims using C# (.NET Framework/Core, WCF, MVC), streamlining claim processing by 30%.
- Designed, developed, and maintained APIs to streamline policy management and integrate seamlessly with internal systems, improving operational efficiency.
- Improved database performance by optimizing SQL Server and Oracle queries through Entity Framework, reducing data retrieval time by 35%.
- Developed user-friendly front-end interfaces in Angular 8–13, HTML5, CSS3, and Sass, increasing user satisfaction scores by 20%.
- Leveraged **ChatGPT** to assist with code refactoring, test coverage, and documentation.

Jan 2020 – Apr 2021: Software Engineer | 6ya (Startup – Troubleshooting Platform)

- Developed web applications using C#, Vue.js, and Nuxt.js, delivering a seamless troubleshooting experience for users.
- Optimized SQL Server databases to handle high user traffic, reducing latency by 25%.
- Partnered with UI/UX teams to implement cross-functional features, improving platform usability by 18%.

Jun 2018 – Jan 2020: Software Engineer | Powercom Ltd

- Designed and deployed GIS map solutions for electricity and water meter management using C# and React, improving operational efficiency by 40%.
- Built robust APIs for real-time GIS operations, reducing processing errors by 15%.
- Improved data processing speed by 30% through efficient stored procedures and query optimization in SQL Server.

Nov 2015 – Jun 2018: Software Engineer | Geoda

- Developed GIS systems using C# and JavaScript frameworks, including Angular 2-4, Python and Dojo, enhancing geospatial analytics capabilities.
- Ensured data integrity and accelerated queries by 25% through rigorous optimization of SQL Server, MySQL, and Oracle databases with Entity Framework.

Education

2011 - 2015: BSc in Computer Science | College of Management Academic Studies
