EDUCATION

B.Eng. in Software Engineering

École de technologie supérieure (ÉTS), Université du Québec à Montréal

Sep 2018 – Present

Montréal, QC

DEC, Computer Science

Cégep de Granby Haute-Yamaska

2018

Granby, QC

High School Diploma

École Secondaire Joseph-Hermas-Leclerc

2013

Granby, QC

SKILLS

Programming & Languages	TypeScript Python C (basics) JavaScript C++
Frameworks & Tools	React (Hooks) Webpack Flask Redis Docker Ansible
DevOps & CI/CD	GitLab GitLab CI/CD Renovate Semantic-release Dependency maintenance
Telephony & Systems	SIP phones Asterisk PBXs N-API bindings
Methodologies & Project	Agile Sprint planning Issue planning Code reviews Demos

EXPERIENCE

MyHealthhub – Full Stack Software Developer

2020 – 2025

Montréal, QC

Full-time / internship / part-time

- Developed frontend and backend features for a healthcare web application using TypeScript, React (Hooks), Flask, and Docker.
- Designed and maintained backend services and REST APIs supporting healthcare data workflows and integrations.
- Built and maintained deployment automation with Ansible roles, Docker, and Docker Compose for consistent multi-environment delivery.
- Maintained and contributed to several internal projects, ensuring code quality, dependency updates, and long-term stability.
- Implemented CI/CD pipelines and dependency maintenance using GitLab CI, Renovate, and semantic-release.
- Worked on SIP phone integrations and low-level bindings (N-API) to interoperate with native C libraries and Asterisk PBX during VoIP feature development.
- Introduced test-driven development practices, code reviews, and improved sprint planning and issue refinement processes.
- Designed and optimized Dockerfiles and Docker Compose setups for multi-service environments, improving developer workflow and deployment consistency.

Mabilleterie.ca – Web Developer (Part-time)

2018 – 2020

Montréal, QC

Part-time / internship

- Built and maintained web front-ends with HTML/CSS and JavaScript; used GitHub and Jira for collaboration.
- Contributed to performance improvements and bundling using Webpack.

Bonduelle Amériques – IT Support Technician

Winter 2017

St-Césaire, QC

Internship

- Provided on-site technical support and followed enterprise procedures; gained experience with professional workflows and autonomy.

NOTABLE PROJECTS

SIP Tooling and PBX Automation

2021 – 2024

MyHealthhub

Montréal, QC

- Developed tools and scripts to automate testing, deployment, and failover scenarios for multi-PBX SIP systems (Asterisk, SIPp).
- Created Node.js N-API bindings to wrap native liblinphone C code for programmatic SIP control, registration failover, and automated testing.

FHIR Integration and Medplum Automation

2023 – 2025

MyHealthhub

Montréal, QC

- Designed and implemented an HL7-to-FHIR conversion pipeline integrated with Medplum for healthcare data synchronization.
- Implemented secure OAuth2 authentication and external identity provider (IdP) integration to support federated access control.

LANGUAGES

- French — Native / Fluent.
- English — Professional working proficiency.
