PROFESSIONAL SUMMARY

- 5+ years of experience developing and upgrading enterprise applications using **C#, .NET Core, SQL Server, and React**.
- Delivered scalable systems across **fleet telematics and supply-chain platforms**, focusing on debugging, optimization, and version upgrades for production systems.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET Core, ASP.NET, React, JavaScript, HTML5, CSS3
- **Databases:** SQL Server, PostgreSQL, BigQuery
- **DevOps & Tools:** Docker, GitLab CI/CD, Linux, Keycloak, Postman
- **Core Competencies:** System Upgrades, Reverse Engineering, Debugging, REST APIs, Agile/Scrum

EDUCATIONS

Master of Applied Computing – University of Windsor, Windsor, ON

Sep 2023 – Apr 2025

Bachelor of Computer Science & Eng. – AIUB, Dhaka, Bangladesh

Jan 2015 – Aug 2018

PROFESSIONAL EXPERIENCES

Software Developer Intern – Geotab, Oakville, ON

Sep 2024 – Aug 2025

- Developed .NET Core REST APIs for telematics and diagnostics, improving data processing and system scalability.
- Integrated Keycloak authentication with OAuth2.0 to centralize identity management and strengthen security.
- Built dashboards with BigQuery and Superset to monitor user migration and anomalies, delivering insights 10x faster.
- Improved GitLab CI/CD pipelines with conditional and downstream jobs, cutting deployment times by 3x.
- Collaborated with cross-functional teams to deliver UI/UX improvements in React.

Senior Software Engineer – BRAC IT, Dhaka, Bangladesh

Jan 2023 – Jul 2023

- Led development of a meeting automation platform using .NET Core, React, and Microsoft Graph API, improving scheduling efficiency by 10x.
- Designed and deployed banking chatbot for customer service, integrating NLP into existing systems for real-time responses.
- Designed and deployed a real-time customer support portal with .NET APIs and React, improving client response times.
- Optimized SQL queries and database workflows across SQL Server, and PostgreSQL, reducing processing times by 20x.

Software Engineer – BRAC IT, Dhaka, Bangladesh

May 2018 – Dec 2022

- Delivered multiple enterprise banking applications using .NET Core, C#, React, SQL Server, and PostgreSQL, used daily by 5,000+ employees.
- Developed and maintained credit and loan management systems, reducing manual processing time by 20x.
- Built and deployed React-based portals integrated with .NET APIs, improving customer onboarding speed by 30%.
- Containerized and deployed .NET applications with Docker, increasing environment consistency and reducing release failures by 40%.

PROJECTS

AtWork – BRAC IT

Technology Stack: C#, .NET Core, Python, scikit-learn, Angular, Docker, Selenium, PostgreSQL, GitHub, JIRA

- Developed statistical analysis module and prediction system to provide meeting-related statistics for increasing effectiveness
- Facilitated meeting creation using MS Graph API, reducing time by 5 times compared to traditional process

Parker – BRAC IT

Technology Stack: NET, SQL Server, React, Python (OCR, Scikit-Learn, Pandas), PyAutoGUI

- Developed a website for managing extracted loan data for clients and companies including a loan decision-making portal, reducing process completion time up to 20x.
- Designed loan processing application for BRAC Bank employees, automating and facilitating loan processing using ML.

ACHIEVEMENTS AND INVOLVEMENTS

Award: Recognized as one of the top performing employees for the 2022 year while working on AtWork at BRAC IT.

Volunteering: Assisted Geotab’s October Donation Drive by sorting and packing 1,255 donated items

Hackathon: Built AI-driven chatbot prototype with LangChain + Vertex AI, demonstrating GenAI automation in enterprise use cases.
