Summary

Software Developer and Computer Science graduate with hands-on experience designing, building, and maintaining scalable applications and automation solutions. Strong proficiency in Python, Java, and SQL with experience developing RESTful services, data-driven dashboards, and backend logic. Proven ability to write clean, maintainable code, collaborate in agile teams, and translate requirements into reliable software solutions. Seeking entry-level to early-career Software Developer or Software Engineer roles.

Skills

Programming Languages: Python, Java, SQL, C++, JavaScript

Software Development: Object-Oriented Programming, Data Structures, Algorithms, Clean Code

Backend & APIs: REST APIs, Backend Development, System Integration

Databases: MySQL, PostgreSQL

Web Technologies: HTML, CSS, JavaScript

Cloud & Platforms: AWS, Microsoft Azure

Tools & Practices: Git, Agile/Scrum, Unit Testing (basic), Debugging

Professional Skills: Problem Solving, Code Reviews, Communication, Collaboration

Experience

Software Developer (Software Engineering Focus)

May 2024 – Sep 2025

Suvya — Founder-led Startup

- Designed and implemented backend logic and automation scripts using Python to support business workflows.
- Built and maintained web components using HTML, CSS, JavaScript, and Shopify, ensuring performance and reliability.
- Developed data processing modules and system integrations to support analytics and reporting pipelines.
- Collaborated with stakeholders to gather requirements, debug issues, and deliver production-ready features.

Intranet Specialist Intern

May 2023 – Aug 2023

Peel District School Board

- Contributed to development of backend features supporting an internal knowledge platform.
- Implemented Python-based scripts to automate content processing and system workflows.
- Assisted with debugging, testing, and deployment of application updates in an agile environment.

IT Intern

May 2022 – Dec 2022

FlavourFirst Inc.

- Developed Python and Excel automation scripts to streamline inventory and operational processes.
- Assisted in migrating systems to cloud-based platforms and validating system functionality post-migration.

- Provided technical support while documenting system behavior and recurring issues.

Projects

Full-Stack E-Commerce Web Application

- Built and customized web application components using HTML, CSS, JavaScript, and Shopify.
- Integrated analytics and third-party services to support data-driven decision-making.

Generative AI Chat Application

- Developed a chatbot using Python, LangChain, and OpenAI API with modular backend logic.
- Implemented prompt handling, error management, and API integrations.

Customer Analytics Backend Pipeline

- Designed SQL-based data pipelines feeding analytics dashboards and reporting tools.
- Optimized queries to improve data retrieval performance and accuracy.

Education

Bachelor of Science (BSc) in Computer Science

University of Guelph

Graduated 2024

Certifications

- Agile Project Management — Google (2024)
- Career Essentials in Generative AI — Microsoft & LinkedIn (2025)

Additional Information

Open to Software Developer and Software Engineer roles • Eligible to work in Canada • Open to remote, hybrid, and in-person opportunities
