Bio

Software Engineer with five years of professional experience, specializing in end-to-end delivery, APIs, and databases. Background writing code for Access Controls and provincial government projects. Most recently worked as the sole developer at Charge Solar, where I designed, built, and maintained multiple applications.

Skills

Languages: PHP, TypeScript, JavaScript, Python, HTML, CSS, C#, C

Frameworks & Libraries: Angular, Node.js, PrimeNG, Zend, Bootstrap, NestJS, Express

Databases: PostgreSQL, MySQL, MongoDB

Tools & Platforms: WordPress, WooCommerce, Git, Power Automate, Elementor

Experience

Full Stack Developer, Charge Solar – Victoria, BC Oct 2024 – Dec 2025

- Built solar racking BoM calculators, a solar billing tool, and project intake systems to automate quoting and setup.
- Developed Pallet Building and Engineering Status apps to improve shipping accuracy and provide automatic updates to project statuses for partners.
- Created a custom e-commerce checkout with dynamic pricing, payment integration, and sync to ERP
- Delivered end-to-end solutions using JavaScript, PHP, HTML/CSS, MySQL, Power Automate, WordPress/WooCommerce, Elementor, and Bootstrap.

Intermediate Software Developer, Delta Controls – Surrey, BC Dec 2020 – Jan 2024

- Built a client-facing API that supported acquisition of major enterprise customers with campus-scale infrastructure.
- Developed, designed, and led UI features like scheduling, reports, mobile credentials, and elevator control.
- Created and optimized PostgreSQL schemas, queries, and migrations to support multimillion-record datasets efficiently.
- Wrote in TypeScript, HTML5, and CSS with Angular, Node.js, and PrimeNG in the frontend. Utilized PHP in the backend with Zend framework.

Software Developer I, FreshWorks Studio – Victoria, BC May 2020 – Oct 2020

- Developed REST API for a mobile application using TypeScript, NestJS, and MySQL.
- Implemented a NestJS monorepo with generic endpoints serving as a database abstraction layer for migrating applications to a new government database.

Software Developer Co-op, ISM Canada – Victoria, BC Sept 2018 – Apr 2019

- Built web and desktop applications that automated or significantly improved workflows for warehouse teams, IT staff, and clients.
- Led requirements gathering and development for two applications, delivering on-site demos to stakeholders.

Education

University of Victoria – Bachelor of Software Engineering

May 2020
