PROFILE

Resourceful Web Developer Intern with hands-on experience designing, coding, and modifying websites from layout to functionality. Skilled in crafting responsive user interfaces with a strong understanding of UI/UX principles, cross-browser compatibility, web standards, and modern development practices.

EDUCATION

Fanshawe College

London, ON, Canada

Diploma: Interactive media design

2024 – 2025

- Modern Web Development & Designing
- Full-Stack Web Developer

SKILLS

Technical: HTML, CSS, JavaScript, TypeScript, PHP, MySQL, Node.js (Express), MongoDB, REST APIs, Content Management Systems (CMS), Object Oriented Programming (OOPs), Next.js

Tools: Git, GitHub, Visual Studio Code, Postman

EXPERIENCE

Sales Sherpa - *London, ON, Canada*

Jan 2025 – March 2025

Full-Stack Developer

- Spearheaded the end-to-end development of Sales Sherpa's official website as the Full-Stack Developer, delivering a modern and scalable digital presence.
- Collaborated closely with the company's manager to align design and functionality with strategic business goals and brand identity.
- Built and deployed the application using Next.js with TypeScript, ensuring performance optimization and responsive design across devices.
- Developed a robust backend using Node.js with Express and integrated MongoDB for dynamic content management and data storage.
- Maintained clean, modular code and documentation to support future scalability and developer onboarding.

PROJECTS

Brothers in Arms - Srishti Foundation (Jan 2025 – April 2025)

- Led full-stack development for a memorial website as part of a client-based capstone project, collaborating with a multidisciplinary team to meet real-world requirements.
- Built the front end using Vue.js with Element UI, incorporating a responsive layout and an integrated 3D model viewer to enhance interactivity and user engagement.
- Developed a custom backend and content management system (CMS) using Laravel (PHP), enabling the client to easily manage and update site content without developer support.

Fanshawe College Hackathon (Sep 2024 – Dec 2024)

- Collaborated as a member of a 4-person team to design and develop a dynamic college program website under tight time constraints during an internal hackathon competition.
- Implemented front-end functionality using JavaScript, SASS for modular styling, and GSAP to create engaging UI animations.
- Integrated APIs and AJAX for real-time student data handling, enabling efficient information management and seamless user interactions.
