PROFESSIONAL SUMMARY

Motivated Software Developer based in Ontario, Canada, with a strong focus on Java development and backend logic. Proven ability to design and implement structured applications using Object-Oriented Programming (OOP) principles. Experienced in version control using Git and GitHub, and proficient in using NetBeans for building robust software solutions. A fast learner and problem-solver dedicated to writing clean, maintainable code. Software developer with strong expertise in Java, SQL, and object-oriented programming to build efficient and maintainable applications. Proficient in utilizing Git, GitHub, and modern IDEs to streamline development workflows and optimize CRUD operations. Focused on leveraging technical skills and logic optimization to contribute to innovative software solutions and drive project success.

TECHNICAL SKILLS

- Java (Core):
- SQL:
- Git:
- GitHub:
- NetBeans:
- IntelliJ IDEA:
- VS Code:
- Object-Oriented Programming (OOP):
- Data Structures:
- CRUD Operations:
- Logic Optimization:

Arturo Guerrero Cuello

Software Developer

TECHNICAL PROJECTS

— Present

Java Development Suite, GitHub Portfolio

- Developed a suite of applications focusing on core Java logic and desktop management.
- Applied OOP principles such as Inheritance and Polymorphism to create modular code.
- Managed the full development lifecycle, from initial logic design to version control via Git.

— Present

Database & Logic Systems,

- Created programs to handle data structures and basic persistence, focusing on code efficiency.
- Implemented error handling and exception management to ensure application stability.

EDUCATION

Jun 2019 - Apr 2023

Software Development Studies, Politécnico Internacional | colombia
