

PROFESSIONAL SUMMARY

Versatile Software Development Programmer with a strong background in Python development, CI/CD automation, and full-stack web technologies. Proven track record of building robust software delivery systems and optimizing complex integration workflows. Adept at managing the full software development lifecycle within Agile environments, from initial configuration to automated deployment.

EXPERIENCE

Pipeline TD Dev

October 2023 - September 2025 | FOLKS, Montreal, Quebec

- Configuring, building, and installing VFX software applications for optimized pipeline management and stability.
- Developing and deploying Rez packages to streamline application deployment and ensure efficient software delivery.
- Implementing CI/CD automation with GitLab to ensure reliable software delivery and continuous integration.
- Troubleshooting and resolving incidents within the VFX pipeline, including complex build and deployment issues.
- Modernizing and optimizing pipelines to meet evolving user needs and enhance overall efficiency.

Pipeline Support

November 2022 - October 2023 | FOLKS, Montreal, Quebec

- Provided technical support for pipeline-related issues, including build and integration challenges, ensuring smooth daily operations.
- Collaborated closely with development teams to identify, design, and implement pipeline improvements and resolve systemic issues.
- Documented pipeline processes and workflows for better team collaboration and knowledge transfer.
- Led training sessions for new team members on pipeline usage and best practices.

Web Developer

April 2021 - February 2022 | OCX Services, Longueuil, Quebec

- Developed full-stack web applications using AngularJS, PHP (Laravel), and MySQL.
- Participated in the design and implementation of a service for automated invoice reading via text recognition.

Junior Full-Stack Developer

February 2021 - March 2021 | OCX Services, Longueuil, Quebec

- Contributed to web application development and coding using AngularJS and PHP Laravel.

PROJECTS

- Pipeline Automation for VFX, Built and managed CI/CD automation pipelines for VFX software deployment using GitLab, significantly improving delivery speed and reliability.
- Rez Package Development, Created custom Rez packages to facilitate smooth application deployments within the VFX pipeline, streamlining software distribution.

EDUCATION

Attestation of College Studies in Computer Programming

March 2021
Cégep Gérald-Godin, Quebec

SKILLS

- Python development
- CI/CD automation and version control
- Software configuration management
- Build tools: Rez, Make, CMake
- C/C++ debugging
- Linux package management
- Containerization and virtualization
- Functional testing
- Agile methodologies
- VFX software expertise
- Rez package development
- AI workflow management
