

ABOUT ME

I am a **Canadian citizen – US TN Visa eligible (no US sponsorship required)** with strong coding skills and proficiency in **C#, C/C++, and Java**. My background includes **graphics engineering, CAD/CAM concepts, and 3D geometry workflows**, along with hands-on experience using **Android Studio, Unreal Engine, and Unity Engine** to build real-time graphics, simulation, and interactive applications. In addition to applied skills, I have studied theoretical foundations such as **algorithm analysis, object-oriented software construction, parallel computing, and data and network structures**. My primary interests lie in software engineering projects focused on **Game Development** and **spatial programming** for **AR/VR/XR** apps.

NARIMAN MILANFAR

EDUCATION

The University of British Columbia

Graduation Date: April 2026
Bachelor of Science - Computer Science

University of Toronto

Graduation Date: July 2022
Certificate - XR Development

Capilano University

Graduation Date: April 2020
Pre-University Science Bridge Program

GAME PROJECT

Galagasis [\[link\]](#)

Solo Developer | UI Designer | Gameplay Programmer

Tools: Unity, C#

Key Technical features: Resolved complex collision and movement challenges by refining collider logic and implementing responsive player tilting without affecting horizontal control, resulting in smoother and more reliable gameplay.

Result: Successfully published to Unity Play (WebGL), delivering a complete and playable arcade shooter experience.

SOFTWARE ENGINEERING CAPSTONE PROJECT

THE UNIVERSITY OF BRITISH COLUMBIA

Exam Generation & Analysis System [\[link\]](#)

May 2025-Aug 2025 - Kelowna, BC

Role: Full-stack Developer on a 4-person Agile team

Tech Stack: React, TypeScript, Node.js, Next.js, Tailwind CSS, PostgreSQL, Prisma, Docker, Figma, Git.

Key Accomplishments: Developed a responsive web application that enabled instructors to create, manage, and analyze optically marked exams with automated variant generation and visual performance insights.

Impact: Deployed a fully functional web application that reduced manual grading time by ~60% and improved instructional insight through real-time analytics and year-over-year comparison dashboards.

SCHOLARSHIP

Issued by The University of British Columbia
