Phone: +1 438 924 1882

SKILLS

Technology

Java, Spring-Boot, JavaScript, TypeScript, React, NextJS, NodeJS, React-Native, Linux user,, Git, CI-CD, MongoDB, SQL, Docker, Agile, Restfull API, GraphQL, Golang, C#, Python, Django

Personal

- ✿ Eager to learn new tools.
- ✿ Troubleshooting and Debugging
- ✿ Active listening
- ✿ Customer service orientated
- ✿ Careful consideration of edge cases and potential errors.
- ✿ Document the problem's solution
- ✿ Skilled in balancing multiple projects and tasks simultaneously.
- ✿ Patience and persistence in debugging and troubleshooting issues.

EDUCATION

- ✿ 2024 - Bachelor Degree - Computer Science • Concordia University • Montreal
- ✿ 2020–2024 • DEC Computer Science • Dawson College • Westmount
- ✿ 2018–2020 • DEP • Computing Support • Electrotechnology Centre L. B. Pearson • Montreal.

LANGUAGES

- ✿ English speaking and writing.
- ✿ French speaking.
- ✿ Turkish speaking and writing.

PROFILE

I have accumulated valuable experience from my previous roles and jobs. Throughout my career, I have consistently demonstrated a strong work ethic, reliability, and self-motivation, which have allowed me to effectively multitask and manage various responsibilities across different levels. I take pride in my ability to create a welcoming and inclusive environment while efficiently assessing and addressing the needs of diverse groups. My skills also extend to troubleshooting and debugging, enabling me to adeptly resolve computer-related issues for individuals.

PROJECTS

SaveEasy Mobile Application

Technologies: TypeScript, React-Native, Expo, Docker, Git

- A financial tracking application that provides to clients their financial status and application also able to create a report given time with their receipts to make it easy to provide a financial report to the accountant. Application also able to generate a chart to display based on the purchasing category.
- Application released already the [Apple](#) and [Google Play](#) Store.

VDrivers Mobile Application

Technologies: Spring Boot, Maven, MSSQL, TypeScript, React-Native, Expo, Docker, Git, MSSQL, TanStackQuery, Axios

- The application provides a business owner to find a extra worker in their rush hours. Like restaurant owner finds easily a driver and kitchen worker.
- Clients connect with FCM services so they can easily communicate and interact.
- The system includes 3 applications that 2 mobile apps (Driver and Business) one for the web application for Admin users.

Restaurant Recipe Project

Technologies : TypeScript, ReactJs, Mongoddb, NextJs, React-Native, TailwindCSS, NextAuthJs, LeafletJS, Mongoose, JWT, Git.

Integrated location-based services to calculate delivery times based on user addresses, enhancing operational efficiency; lessened average delivery time estimates by 15%, leading to improved customer satisfaction

Launched a feature that displayed the shortest delivery paths, optimizing logistics and reducing average delivery distance by 10%, contributing to a more sustainable and cost-effective operation.

Hotel Management System Project

Technologies: TypeScript, React, TailwindCSS, MongoDB, React-Native, Leaflet, Docker, Git.

Admin App: Upon registration in our system, each individual is assigned a unique set of credentials and has subsequently created their own login information.

Owner App: As a hotel owner, you can create and manage various aspects of own hotels, such as room types, amenities, and branch information.

Agency App: Registered agencies can see all registered hotels' features and room availability and can offer clients more affordable price features.

EXPERIENCE

Lead FullStack Developer Turina Tech 2024 September — 2025 September

Technologies: ReactJs, TailwindCss, React-Native, Expo, Docker, Git, Spring Boot, Jira, Firebase, .NET, Agile Dev.

- ✳ Written the code to fix an existing issue, implemented new features, and added unit test cases.
- ✳ Participating in daily meetings with team members and checking the daily progress of our implementation.
- ✳ Creating tasks and user stories, and following up on these tasks' progress and team members' development.
- ✳ Created a mobile application and implemented IOS and Android features and differences are added.
- ✳ Collaborated with the QA team in daily meetings and updated code based on their daily test reports.
- ✳ After the assigned test's implementation is completed, a new pull request and PR are approved and merged into the main branch, so Incorporated with other developers.
- ✳ Helped improve the Figma design and gave UI/UX design teams more feedback.

Computer Technician, Dawson College, Montreal, 2024 August - 2024 October

- ✳ Fixed broken computers, printers or other devices.
- ✳ Deployed new Windows, MacOS or IOS based on the school security restrictions.
- ✳ Installed, configured, and upgraded software applications and operating systems.
- ✳ Troubleshooted and resolved software issues, including operating system errors and application crashes.
- ✳ Performed regular maintenance on computer systems to ensure operated efficiently.
- ✳ Troubleshoot hardware and software issues, including operating systems, applications, and network connectivity.
- ✳ Install, configure, and maintain IT equipment such as workstations, printers, and network devices in clinics and head office locations.
- ✳ Assist in setting up and managing user accounts, passwords, and permissions in accordance with IT policies.

Intern FullStack Developer Saadat Development 2024 Apr — 2024 June

Technologies: ReactJs, TailwindCss, React-Query, Socket.IO, JWT, React-Router, Docker, Git, Jotai.

- ✳ Written the code to fix an existing issue or implemented 24 new features.
- ✳ Created 60 new test cases with Jest and React-Testing Library.
- ✳ Conducted a thorough review of the code base, creating a report to document and address any errors found, ensuring high code quality.
- ✳ Executed and managed global state to ensure data consistency across the application with Jotai.
- ✳ Enforced React-Query to handle integrated front-end components with RESTful APIs and data fetching, caching, and error handling.
- ✳ Incorporated the version control systems to manage code changes and collaborate with other developers.

Computer Technician, Dawson College, Montreal 2023 Oct – 2023 - Dec

- ✳ Fixed broken computers, printers or other devices.
- ✳ Deployed new Windows, MacOS or IOS based on the school security restrictions.
- ✳ Installed, configured, and upgraded software applications and operating systems.
- ✳ Troubleshooted and resolved software issues, including operating system errors and application crashes.
- ✳ Performed regular maintenance on computer systems to ensure operated efficiently.

Computer Technician, Lester B. Pearson SB, Montreal 2019 Nov - 2020 Feb

- ✳ Answered the school administration's and teachers' requests regarding computer or technical questions and suggestions.
- ✳ Repaired malfunctioning computers, printers, smart-boards, projections or other devices..
- ✳ Documented troubleshooting steps and solutions for future reference.
