SUMMARY

Seasoned IT leader with 25+ years of experience in senior management roles, building and leading high-performing engineering teams focused on security, compliance, cloud-native infrastructure, and operational efficiency. Led IBM Cognos Analytics through multiple successful SOC 2 Type 2 and Planning Analytics through SOC 1 audits. Proven expertise in establishing security practices, managing automated scanning and testing, resolving escalated security incidents, and achieving formal recognition for improving security posture in enterprise environments. Track record of strategic planning, team mentorship, and delivering scalable SaaS platforms for Fortune-500 clients, including Lockheed Martin, TD Bank, L'OREAL and AT&T.

PROFESSIONAL EXPERIENCE

Sr. Software Engineering Manager — IBM

Feb 2021 – Present | Ottawa, Canada

Led four engineering teams (Secure Engineering, Cloud Pak for Data deployments, Dashboards, Samples & Globalization) supporting IBM Cognos Analytics – a global enterprise BI SaaS platform with 63+ major customers including Bank of America, US Navy and Citi Bank.

- Led the organization to successful SOC 2 Type 2 and SOC 1 audits through control design, evidence preparation, remediation leadership, and direct collaboration with external auditors
- Managed up to 28 individuals across diverse engineering functions and locations.
- Owned end-to-end delivery of Cognos Analytics and IBM Dashboards on Red Hat OpenShift (Kubernetes) – full-stack platform engineering, CI/CD, and production operations at scale.
- Established security as a first-class discipline: introduced automated SAST/DAST/container scanning, penetration testing, and threat modeling; achieved formal recognition from IBM Corporate Security for dramatically improving product security posture.
- Partnered daily with Product Management, Risk, Legal, Compliance, and Customer Success on escalated security incidents and new feature delivery.
- Hired, coached, and retained top engineers across security, DevOps, and globalization; built high-trust, high-velocity culture.

Security Focal & Manager of Security and Automation — IBM

Feb 2020 – Feb 2021 | Ottawa, Canada

- Primary security focal for Cognos and Planning Analytics; resolved highly escalated customer security issues.
- Designed and rolled out low-maintenance security practices adopted product-wide.
- Recognized by IBM Business Information Security Office for improved security posture.
- Delivered new low-maintenance scanning and testing practices.
- Tripled number of automated tests executed per PR.

Software Engineer → Team Lead → Manager — Cognos (Acquired by IBM)

2005– 2019 | Ottawa, Canada

- Delivered features across C++, Java, JavaScript, and multi-platform environments.
- Full-stack contributor (C++, Java, JavaScript, C#) on flagship BI products (PowerPlay, Cognos Office Connection).
- Hold 7 granted U.S. patents in data visualization, business intelligence, and modeling.
- Built automation interfaces and extensibility features for Cognos Office Connection.

EDUCATION

Bachelor of Computer Science — University of Ottawa (2000)

CERTIFICATIONS

- Machine Learning — Coursera (Andrew Ng)
- Multiple IBM Leadership and security certifications
