FULL-STACK DEVELOPER | PRODUCT MANAGER

PROFESSIONAL SUMMARY

Full-Stack Developer and Product Manager with 10+ years of experience delivering high-performance, user-focused web applications across blockchain, fintech, and AI. Deep expertise in React, Next.js, TypeScript, Node.js, and scalable backend systems. Proven ability to improve performance, architect reliable solutions, and ship features end-to-end. Collaborates closely with product and engineering teams to create seamless interfaces, efficient APIs, and well-structured systems that scale.

AREAS OF EXPERTISE

- ✓ **Product Management:** Asana, JIRA, Trello, ClickUp
- ✓ **Frontend Technologies:** React, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Radix UI
- ✓ **Version Control & CI/CD:** Git, GitHub, Docker
- ✓ **AI Pipelines:** Cursor, Ollama, Stable Diffusion, Chain-of-Thought workflows
- ✓ **Blockchain:** Ethereum, NFTs, Smart Contract Integration, Ethers, web3.js
- ✓ **Backend Technologies:** Node.js, Express, PostgreSQL, Prisma, GraphQL, Redis, BullMQ, Jest, RESTful APIs

CAREER HIGHLIGHTS

Front-End Development: Led the development of WeFilm's NFT platform from concept to production and created custom AI pipelines for SEO and content optimization. Mentored interns and junior developers in frontend best practices, enabling them to independently manage and deliver projects.

Backend Development: Developed scalable backend systems using Node.js, Redis, PostgreSQL, GraphQL, and Prisma to support high-throughput workflows at a 1.5M-user scale. Optimized queueing and data-processing pipelines, introduced efficient batching/grouping methods resulting in faster performance, reduced infrastructure costs, and more reliable backend operations.

Project Management: Coordinated cross-functional teams for major product launches and rebrands, reducing website turnaround time from 2 months to under 3 weeks. Introduced an MVP framework to streamline project delivery.

PROFESSIONAL EXPERIENCE

Backend Engineer

Sapient AI — Remote, BC | May 2025 – Dec 2025

- Built and maintained backend services for Web3-enabled staking and user-tagging workflows supporting ~1.5 million users.
- Developed APIs using Node.js, Express, GraphQL, and Prisma + PostgreSQL.
- Architected batching, and grouping of user tags for QA significantly cutting operating expenses.

Frontend Engineer

Covalent — Vancouver, BC | Jan 2021 – Mar 2025

- Spearheaded migration from Hugo to Next.js, boosting scalability and performance.
- Designed and implemented front-end architecture leveraging Dato CMS, Radix UI, and Covalent API.
- Optimized the staking dashboard, reducing load times by 4x through private RPCs and caching.
- Delivered serverless functions and React hydration for faster page loads and efficient API usage.
- Contributed to \$1M+ ARR growth and \$23M+ TVL on staking platforms.

Project Lead Developer | Product Manager

WeFilmChain / Starwire — Remote | Dec 2019 – Jan 2021

- Developed blockchain-integrated NFT creation and payment platforms.
- Delivered React Native mobile apps with decentralized payment features.

EDUCATION

Bachelor of Management | *University of British Columbia*

Web Development, Computer Software Engineering | *Lighthouse Labs*
