120 Magnolia Way SE
Calgary, AB T3M 3M5
Tel: 587-717-2717 Email: deepain.nayyar@gmail.com

PROFILE SUMMARY

- Highly self-motivated and goal-oriented professional with 15+ years of computing experience in software development
- Extensive knowledge on application development and relevant experience in Software Development Lifecycles (SDLC)
- Worked closely with cross-functional teams, including software engineers, product managers, and quality assurance professionals, to deliver software solutions on time and within scope.
- Experienced in Object-Oriented programming, including design and prototyping, implementation and unit testing, integration testing, and support during design verification
- Proficient programming skills in C#, C/C++, Java and MS SQL Server
- Experienced working in Agile Software Development and methodologies
- Proficient with version control system like GIT and SVN

TECHNICAL SKILLS

Programming Languages: C#, C/C++, Java, XAML, Delphi, ASP.NET, SQL, Perl, Python

Framework: .Net MAUI

Web Development: JavaScript, PHP, HTML5, CSS

Databases: MS SQL server, My SQL, MongoDB

Tools: Visual Studio, IntelliJ IDEA, MS SQL Server Management Studio, Borland Delphi, JIRA, SVN

Operating Systems: Windows, Linux, QNX

PROFESSIONAL EXPERIENCE

Software Developer

February 2022 – December 2025

DIRTT Environmental Solutions, Calgary, Canada

- Designed, developed, and maintained high-quality software applications, ensuring they meet project requirements, coding standards, and best practices.
- Addressed performance bottlenecks, suggested solutions and ensured software applications are responsive and efficient.
- Worked on multiple projects and ensured that the project is delivered on time with high quality output.
- Developed and executed unit and integration tests to ensure the reliability and functionality of software components.

Software Developer

May 2018 – February 2022

Westronic Systems, Calgary, Canada

- Successfully lead and delivered the software application to the client with responsibilities of planning, budgeting, breaking down the work and managed the project from requirements through design, implementation, and release. The developed software application resulted in the additional revenue generation for the company from previous clients and also added new clients into the list and selling the hardware compatible with new software design
- Re Modelled the application to move from local client based to client/server model and moved from local database to SQL Server Express using .NET framework and managed multiple clients on single server and shared database application

- Reduced the download/upload config time for large configs by more than 90% by optimizing the design and implementing new algorithm
- Implemented security-based SSL protocols between client and server, and SSH connectivity between server and RTU
- Ensured all projects assigned are completed accurately and in a timely manner

Software Developer

December 2017 – April 2018

Inova Geophysical, Calgary, Canada

- Responsible for the design and development of embedded software in a Microsoft Windows environment as part of a team of embedded software and hardware developers
- Responsible for submitting software to a version control system using bug tracking software

Software Application Developer

October 2014 – December 2017

Westronic Systems, Calgary, Canada

- Actively collaborated with the team members in the process of research, creating specifications, project design and coding of necessary security and other software products for Westronic equipment
- Ongoing firmware maintenance and development for WS1800 and WS3500 units
- Upgraded the entire firmware from QNX 6.3.2 to QNX 6.5
- Quickly learned and adapted with the Delphi environment and started delivering the results

Software Developer

June 2011 – June 2013

Azcom Infosolutions, Gurgaon, India

- Responsible for the design and implementation of physical layer algorithm for LTE release 8
- Prioritized multiple tasks and managed multiple assignments to deliver the project under strict deadlines. Provided the test solution for LTE HW, DSP and SW integration and provided solution for client's requirements along with coding and implementation
- Supervised a team and delivered the physical layer algorithm development for LTE project under deadlines and demonstrated high quality video demo at mobile world congress
- Analyzed logs, fixed bugs, or assigned issues to appropriate developers. Resolved hundreds of stabilities, performance, timing, and memory issues across multiple domains

Software Developer

September 2008 – June 2011

Hughes Systique Corporation, Gurgaon, India

- Mentored two team members and delivered G.711 VQE project under deadlines
- Prepared and presented weekly status reports to offshore client during weekly call. Discussed and provided the solution to resolve the issues faced during the implementation
- Converted floating point code into fixed point code meeting client requirement of having greater than 98% matching voice activity detection and echo detection flags in all test cases produced by floating point reference code
- Profiled and optimized code for many parts of the system to support 25 concurrent channels per core resulting in 100 channels per DSP

EDUCATION & TRAINING

Object Oriented Software Developer

2014

Southern Alberta Institute of Technology, Calgary, Alberta

Bachelor of Technology in Electronics and Communication Engineering

2004 - 2008

Guru Gobind Singh Indraprastha University, New Delhi, India

IQAS Assessment result – Equivalent to BSC degree in Electrical Engineering
