PROFESSIONAL SUMMARY

Senior Frontend Software Engineer with 6+ years of experience building high-performance, accessible web applications in enterprise and regulated environments. Expert in React, JavaScript, and TypeScript, with a strong focus on modern frontend architecture, performance optimization, state management, and accessibility. Backed by a bachelor's in computer applications and a postgraduate degree in computer science, with a strong full-stack foundation and hands-on experience integrating frontend applications with RESTful APIs and backend services across the full SDLC.

TECHNICAL SKILLS

- **Frontend Engineering:** TypeScript • JavaScript (ES6+) • React • Angular (v8+) • HTML5 • CSS3 • Micro-frontends • Redux • Context API • Vite • Webpack • npm • Tailwind CSS • Material UI • Bootstrap • Ant Design • Responsive & Accessible UI (WCAG) • Modular UI Architecture • JSON • XML
- **State, Performance & UX:** Asynchronous Programming • State Management • Memoization • Virtualization • Code Splitting • Error Handling • Loading & Caching Strategies • Cross-Browser Compatibility
- **Backend & API Integration:** SQL • Java • C# • Python • RESTful APIs • GraphQL • Spring Boot • JPA/Hibernate • ASP.NET Core/MVC • Microservices • Event-driven workflows • System Design (Frontend-adjacent)
- **API Tooling:** Swagger/OpenAPI • Postman • Insomnia
- **Databases:** PostgreSQL • Oracle • MySQL • SQL Server • MongoDB • PL/SQL • Redis (exposure)
- **Cloud & DevOps:** Azure (AKS, Functions, Storage) • Docker • Kubernetes • NGINX • Tomcat • Git • Jenkins • GitHub Actions • Azure Pipelines • CI/CD automation
- **Testing:** Vitest • Jest • React Testing Library (RTL) • Cypress • JUnit • Unit & Integration Testing • Test Automation
- **Security:** Authentication/Authorization • OAuth2 • JWT • SSL/TLS • SAML • RBAC • Azure Entra ID (B2C)
- **Observability:** Datadog • Bugsnag • Structured Logging • Metrics & Monitoring
- **Collaboration:** Jira • Confluence • Bitbucket • GitHub • Figma • Agile/Scrum

WORK EXPERIENCE

SENIOR SOFTWARE DEVELOPER, UNIVERSITY HEALTH NETWORK

JUN 2022 – PRESENT

- Implement major features and cross-system integrations across FHIR-compliant healthcare applications.
- Introduce schema-driven UI rendering and modular frontend architecture in **React 18 + TypeScript**, reducing hard-coded logic and improving configurability.
- Drive consistency in data modeling, error handling, API standards, and observability patterns across services.
- Develop frontend applications using **React**, reusable core hooks, micro-component patterns, and performance optimizations (memoization, virtualization), improving UI responsiveness by **30-40%**.
- Own end-to-end feature delivery from design to development, review, testing, and production rollout.
- Implement comprehensive unit, integration, and functional tests using **Jest, RTL, Vitest, JUnit**, and Mockito, supporting regression-free deployments.
- Partner with Product Managers, clinicians, and business stakeholders to clarify objectives, uncover edge cases, and translate evolving healthcare requirements into actionable engineering items.

- Collaborate cross-functionally to align technical constraints with patient- and clinician-facing workflows.
- Build secure backend services with Spring Boot, Spring Security, **OAuth2/JWT**, JWK validation, and Azure Entra ID (B2C), enabling robust RBAC and claim-driven routing.
- Enhance system reliability through **structured logging**, Dropwizard Metrics, and Bugsnag instrumentation, reducing mean time to root-cause by ~25%.
- Troubleshoot and resolve **L2/L3 production incidents** and drive long-term fixes to reduce repeat issues.
- Maintain **CI/CD pipelines** using **Jenkins**, **Docker**, Maven, and Nexus; introduce pipeline optimizations that improved deployment time by ~20%.
- Manage deployments across **NGINX/Tomcat** with multi-stage workflows.
- Mentor developers, conduct peer reviews, advocate for clean code, maintainability, and modern patterns.
- Break down complex epics into features, user stories and tasks, providing accurate effort estimates that improved sprint predictability.
- Present recommendations shaping long-term roadmap decisions, including modular UI adoption and standardized integration patterns.
- Evaluate new frameworks, testing tools, and architectural approaches; deliver proofs-of-concept to validate feasibility before adoption (e.g., schema-driven rendering, Element/Twilio integrations).
- Drive adoption of new engineering practices that improved code quality and reduced onboarding time for new developers.

SENIOR SOFTWARE ENGINEER (FRONTEND), HCLTECH

APR 2021 TO MAY 2022

- Design, develop, and maintain enterprise web applications using **ReactJS**, **ASP.NET**, and **REST APIs**.
- Perform application **design**, **coding**, **unit testing**, **documentation**, **deployment**, and **production support** across multiple systems.
- Implemented secure APIs and integration workflows across cloud and on-prem environments.
- Linked MVC modules with ASP.NET Core 2.0 & 6.0 Web APIs for fast I/O.
- Integrated **REST APIs** with front-end modules, ensuring seamless user flows and error handling.
- Collaborate closely with Business Analysts, QA teams, DevOps, and stakeholders to translate functional requirements into technical solutions.
- Diagnosed and resolved infrastructure and application issues, performing **root-cause analysis**, and improving **monitoring and logging** to reduce recovery time.
- Resolved dependency conflicts, optimizing build and deploy pipelines.
- Implement features using **relational databases**, optimized queries, and transactional data handling.
- Participate in Agile ceremonies including sprint planning, backlog refinement, estimation, and retrospectives.

PROGRAMMER ANALYST, PORTFOLIO AID INC.

JAN 2020 TO MAR 2021

- Delivered enterprise-grade, full-stack SaaS applications using **React (JavaScript)**, **Redux-Saga**, **Angular**, and **Java (Spring Boot)** supporting high-volume financial and compliance systems.
- Designed and implemented secure **REST** and **GraphQL APIs** with **OAuth2/JWT/SSL-TLS**, enabling reliable cross-platform integration and audit-ready workflows.
- Built and optimized **Oracle PL/SQL stored procedures**, **triggers**, and **queries** to support real-time transaction validation and large-scale data processing.
- Developed modular, accessible, and cross-browser UI components using **React**, **Material UI**, **HTML5**, **CSS3**, improving performance, consistency, and WCAG compliance.
- Implemented Redux-Saga-based asynchronous orchestration and **reusable frontend architecture**, reducing duplicated logic and improving maintainability.

- Automated **ETL** and nightly vendor data ingestion using **Perl/Bash** scripts and **cron** on CentOS, ensuring timely and accurate data transformation.
- Established **CI/CD pipelines** with **Docker**, **Jenkins**, and **Git**, reducing release effort by ~35% and improving deployment consistency across environments.
- Improved application performance by ~25% through SQL tuning, UI optimizations (lazy loading, memoization), and backend pipeline enhancements.
- Led system testing across unit, integration, regression, and UAT using **Jest**, **React Testing Library**, and **JUnit**, significantly reducing post-release defects.
- Collaborated closely with Product Owners, QA, DevOps, and stakeholders to **refine requirements**, **estimate effort**, resolve production issues, and deliver reliable releases on schedule.

WEB DEVELOPER, IMAGE ARCADE

JUN 2017 – APR 2018

- Developed **responsive**, **cross-browser**, web interfaces compliant with **WCAG** and **W3C** standards.
- Translated **UI/UX wireframes** into **reusable**, **scalable React components**, producing clean, maintainable, production-ready markup.
- Built **data-driven user interfaces** by integrating REST APIs and rendering analytics within React components.
- Implemented **state management** using **Redux** and **React Hooks** to support complex UI workflows.
- Delivered **mobile-first layouts** using **CSS Grid**, **Flexbox**, **Bootstrap**, and custom media queries for consistent behavior across devices.
- Ensured **accessibility**, **performance**, and **compatibility** across modern browsers and smart devices.
- Participated in **design and architecture reviews**, collaborating with designers, product managers, and senior engineers to refine UX and technical approach.
- Refactored and optimized legacy components to improve **performance**, **readability**, and **maintainability**.
- Contributed to **Agile development cycles**, supporting sprint planning, reviews, and continuous improvement.

EDUCATION

COMPUTER SOFTWARE AND DATABASE DEVELOPMENT

LAMBTON COLLEGE (TORONTO CAMPUS)

BACHELOR'S IN COMPUTER APPLICATION

SALESIAN COLLEGE

CERTIFICATIONS

- React - The Complete Guide (Udemy Certificate)
- Certified Ethical Hacker (CEHv9)
- Android App Developer
