

Jason Hunter

+1 (647) 825 4973 · Jasonhtd11@gmail.com
Brampton, Ontario

PROFILE

Motivated Software Developer with a strong foundation in Object-Oriented Programming (OOP) using Java, C#, and Python. Experienced in full-stack development, including designing REST APIs, managing data integrations, and creating databases. A proven problem-solver and team lead, eager to build scalable cloud solutions and contribute to all phases of the software development lifecycle.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science with Minor in Economics, Brock University

Microsoft Certified: Dynamics 365 Fundamentals

SKILLS & ABILITIES

Languages & Databases:

C#, Java & Python

JavaScript (ES6+), HTML5 & CSS3

SQL (MySQL & MS SQL Server)

Microsoft Dataverse

Frameworks & Technologies:

.NET & ASP.NET

REST APIs & Integration

Cloud Platforms (Azure & Google Cloud)

Git & Version Control

Software Engineering:

Agile Methodologies (Scrum)

Unit Testing

System Design & Architecture

Object-Oriented Programming (OOP)

PROJECTS

C# Azure Cloud & API Integration Project:

- Developed a **C#** console application which connects to a **Microsoft Dataverse API** using Client Credentials and **OAuth 2.0** authentication.
- Enabled comprehensive data management by successfully implemented full CRUD (Create, Read, Update, Delete) operations on the Contact entity through the ServiceClient using the .NET-based Power Platform SDK.
- Managed **Azure AD** App Registrations, API permissions, and Dataverse security roles, troubleshooting complex authentication issues.
- Demonstrated strong understanding of cloud integration, API security flows, and Microsoft Dataverse architecture.

Artificial Intelligence Article and Video Summarizer (Final University Project) - Project Lead:

- Led an **agile team** as **Scrum Master**, defining the architecture of the full-stack web application and facilitating communication between front-end and back-end developers to ensure project milestones were met.
- Led front-end development, building a responsive & concise interface for the application using **JavaScript**, **HTML**, and **CSS**.
- Designed and implemented a back-end **RESTful API** to integrate a **LLaMA** model, managing user authentication and data persistence with **MySQL** and **Google Identity**.

AI Optimization Engine (Python):

- Developed a **Python Genetic Algorithm** to solve the **Travelling Salesman Problem**, implementing **Ordered Crossover (OX)** and **Tournament Selection** techniques. Optimized convergence efficiency by tuning mutation probability and elitism factors, utilizing inverted bitmasks for rapid gene manipulation.

Additional Technical Projects:

- Engineered **Java** apps including a Markov Chain predictor using weighted probability and an **OOP Tetris** clone.
- Developed responsive, user-centric web interfaces using modern **JavaScript (ES6+)**, **HTML5**, and **CSS3**.

WORK EXPERIENCE

City of Brampton | 2017 - Present

Beach Supervisor, Aquatic Supervisor, Waterfront Lifeguard, Pool Lifeguard, Aquatic Instructor

- Leadership:** Directed and mentored a team of **22** staff members, overseeing daily facility operations, enforcing safety regulations, and providing performance feedback.
- Training & Communication:** Designed and facilitated technical training sessions for groups of up to **50** lifeguards, utilizing MS Word to structure comprehensive curricula on emergency protocols, skill standardization, and team coordination.
- Crisis & Conflict Management:** Managed high-pressure emergencies requiring EMS coordination and de-escalated volatile patron interactions, while leveraging **Excel** to optimize daily staff scheduling. Recognized with the **Supervisor MVP Award** for outstanding leadership and critical decision-making under stress.
