BACKGROUND

Plamen Nenov holds a Master of Science degree and has over 20 years of experience (since 1993) in the IT industry, establishing him as one of the top IT specialists. He has worked as an application developer, system administrator, and network communication specialist.

Throughout his career, Plamen Nenov has had the opportunity to work for:

As a system administrator and network communication specialist at an Internet Service Provider company.

As an internet application developer and Linux/Unix administrator.

As a DevOps engineer, implementing AWS-based CI/CD automation and managing containerized applications using Docker and Kubernetes.

As a second- and third-level application support specialist and financial tools developer for Morgan Stanley and Deutsche Bank.

As a developer and designer of distributed client-server applications for management and control, including Linux/Unix-based backend functionalities for remote diagnostics, statistics, and troubleshooting analysis.

Plamen Nenov demonstrates a strong problem-solving attitude and has played a key role in all of his projects. His ability to design optimal and sophisticated solutions based on front-end, back-end, and DevOps technologies has consistently delivered revenue growth and client satisfaction.

He maintains a strong interest in learning and adopting new, cutting-edge technologies and is deeply dedicated to continuously improving and expanding his expertise in the IT industry.
