SUMMARY

Full-stack product engineer with 4+ years of experience building and scaling data-driven SaaS platforms and eCommerce infrastructure. Specialized in Ruby on Rails, Python, C#, Django and FastAPI, React.js, PostgreSQL, Sidekiq, and modern cloud-native workflows with Docker, Microsoft Azure, and AWS. Delivered performance-critical features and resilient pipelines across multi-tenant platforms and analytics dashboards. Strong proponent of TDD, DevOps-first delivery, and clean, maintainable architecture. Skilled in designing API-first systems and integrating AI capabilities using OpenAI and prompt engineering frameworks.

EDUCATION

Master of Applied Computer Science with Co-op Education St. Francis Xavier University

Sep 2023 - May 2025
Antigonish, Nova Scotia, Canada

- Relevant Coursework: Matrix Computation, Computer Graphics, High-Performance Computing, Data Mining and Machine Learning, Processing and Heuristics, Advanced Data Analytics

Bachelor of Science in Computer Science National University of Computer and Emerging Sciences

Aug 2015 – Aug 2019
Lahore, Pakistan

- Final Project: Real-time extraction of soccer match statistics from video using computer vision & data science

PROFESSIONAL EXPERIENCE

Financial ERP Analyst Sobeys Capital Inc.

Sep 2025 – Present
Toronto, ON, Canada

- Reconcile transactions across **all banners under Sobeys Capital Inc.** using **SAP ECC & S/4HANA**.
- Automate data extraction, validation, and correction processes using **Visual Basic, Excel, and other scripting tools**.
- Perform **ALM testing and UAT** for ERP rollouts, ensuring data integrity and seamless system integration.

Senior Developer Cloud Sailor

Mar 2023 – May 2024
Norway (Remote)

- Built scalable Rails services and internal APIs powering multi-region SaaS apps, containerized via Docker and deployed using CI/CD pipelines on AWS.
- Led performance tuning of Sidekiq queues and optimized Redis caching for large-scale job orchestration.
- Designed cloud-based ETL flows and batch schedulers for structured user activity ingestion.
- Prototyped internal tooling using React.js, Tailwind CSS, and TypeScript to visualize system telemetry.
- Integrated OpenAI API and prompt workflows into a customer-facing automation layer.

Software Engineer GradReady

Jan 2022 - Oct 2022
Australia (Remote)

- Refactored monolithic backend into isolated service modules to support asynchronous event pipelines.
- Enabled on-demand data snapshots for BI via Redshift-compatible warehousing and Glue jobs.
- Improved reliability of Stripe integrations and webhook retry mechanisms.
- Championed TDD and introduced RSpec coverage audits into CircleCI.
- Contributed to real-time student analytics dashboard, aggregating usage metrics via Redis-backed counters and Sidekiq batch jobs.

- Enhanced form validations and submission flows by refactoring legacy JavaScript into modular, jQuery-powered interactions.
- Worked with product teams to develop low-latency admin controls in HAML/ERB.

Software Engineer - II
Sendoso

Jun 2021 - Dec 2021
Lahore, Pakistan

- Designed and maintained data streaming pipelines for warehouse logistics and fulfillment using Sidekiq and RabbitMQ-style patterns.
- Developed scalable Rails microservices to handle inventory reconciliation and shipping metrics.
- Participated in data governance policy and schema versioning discussions for API reliability.
- Instrumented applications with New Relic and Bugsnag to trace anomalies across 3+ warehouses.

Freelance Software Engineer
Upwork

Aug 2020 - May 2021 (Casual)
Lahore, Pakistan

Profile: [upwork.com/freelancers/jibranusman](https://www.upwork.com/freelancers/jibranusman)

- Delivered ETL workflows and admin dashboards for clients using Ruby, Nokogiri, and AWS tooling.
- Automated data extraction from public sources via Selenium and transformed it into structured relational formats.
- Integrated analytics dashboards with Snowflake-hosted datasets and Google Cloud Functions.
- Provided architecture recommendations for cloud-first deployments using Terraform and GitHub CI.

Software Engineer – I
Square63

Jul 2019 - May 2021
Lahore, Pakistan

- Maintained and scaled backend services for content-rich platforms with customizable filtering and role-based dashboards.
- Developed admin interfaces using ActiveAdmin and wrote integration suites with Capybara and FactoryBot.
- Collaborated with senior developers on Spark-based data transformation pipelines for reporting modules.

CORE TECHNICAL SKILLS

- **Languages & Frameworks:** Ruby, Ruby on Rails, Python, Django, FastAPI, JavaScript (ES6+), C#, TypeScript, React.js, Next.js, Vue.js, Slim, HAML, ERB
- **Cloud & DevOps:** AWS (S3, EC2, CloudFront, RDS, IAM), Docker, Microsoft Azure, GitHub Actions, CircleCI, Terraform (intro), Kubernetes (basic)
- **Databases & Pipelines:** PostgreSQL, MySQL, Redis, MongoDB, Snowflake, BigQuery, AWS Glue, Redshift, Data Migrations
- **Testing & Automation:** RSpec, Capybara, FactoryBot, Selenium, Playwright, Cucumber, GitHub Actions
- **Observability & Infra:** New Relic, Prometheus, Bugsnag, Elasticsearch, Rate Limiting, Performance Profiling
- **AI & Integration:** OpenAI API, Prompt Engineering, LangChain (intro), Vector Search (conceptual), Stripe, GraphQL
- **eCommerce & Admin Tools:** Shopify, Spree Commerce, ActiveAdmin, Admin Dashboards, Webhooks

CERTIFICATION AND ACHIEVEMENTS

Vue JS Essentials with Vuex and Vue Router

Udemy | September 2021

- Credential URL: [ude.my/UC-427aae64-1a5a-47bd-a2ed-53c389b34c19](https://www.udemy.com/certificate/UC-427aae64-1a5a-47bd-a2ed-53c389b34c19)

Ultimate AWS Certified Developer Associate 2020

Udemy | October 2020

- Credential URL: [ude.my/UC-7fdc8bc7-118d-47c2-a270-592d9fdebba8](https://www.udemy.com/certificate/UC-7fdc8bc7-118d-47c2-a270-592d9fdebba8)
