PROFESSIONAL SUMMARY

Highly skilled and results-driven Cloud Engineer with over 6 years of experience in designing, deploying, and managing scalable, secure, and highly available cloud infrastructures. Proficient in cloud architecture, automation, and performance optimization across diverse environments. Adept at collaborating with cross-functional teams to deliver innovative cloud solutions that enhance reliability, efficiency, and business growth.

TECHNICAL SKILLS

Cloud Platforms: AWS

Infrastructure as Code (IAC) : Terraform, CloudFormation

Configuration Management : Ansible, Packer, Chef, Puppet

Monitoring & Logging: CloudWatch, Prometheus, Grafana, Datadog, New Relic, Azure Monitor, Dynatrace

Programming Languages: Python, Bash, PowerShell

Version Control: Git and GitHub, Gitlab

Operating Systems: Linux (Ubuntu, CentOS), Windows

Networking: Load Balancers, VPNs, DNS, Firewalls

Compliance & Frameworks: NIST, CIS, HIPAA, SOC, Zero Trust, OBIT

Collaboration & Documentation: Slack, Teams, Jira, Confluence

Security: Aws Config, IAM, MFA, AWS Inspector, Secret Manager, Parameter store, Guard duty, AWS Shield

Diagram/Visualization: Draw.io, Lucid chart, Microsoft Visio

EXPERIENCE

Cloud Engineer

Allstate— Toronto, Canada

January 2022 – Present

- **Designed and implemented** scalable, highly available, and cost-efficient cloud infrastructures using **Infrastructure-as-Code (IaC)** tools such as **Terraform** and **AWS CloudFormation**, enabling rapid provisioning and consistent environment management.
- **Architected, deployed, and managed** secure and resilient solutions on **AWS**, leveraging services such as **EC2, VPC, S3, IAM, RDS, and Auto Scaling** to support business-critical applications.
- **Developed comprehensive cloud architecture designs** covering compute, storage, networking, and security components to ensure alignment with business and technical objectives.

- Implemented robust monitoring and observability frameworks **using** AWS CloudWatch, CloudTrail, and third-party SIEM tools to proactively detect anomalies, optimize performance, and maintain compliance.
- Strengthened cloud security posture by designing and enforcing granular IAM policies, integrating **Okta** for identity federation, and applying **least privilege** access principles with regular audits.
- **Enhanced application security** through **AWS WAF** and runtime protection mechanisms to mitigate web-based threats such as SQL injection and cross-site scripting (XSS).
- **Optimized performance and reduced costs** using **AWS Cost Explorer, Budgets, and Reserved Instances**, achieving measurable savings through resource right-sizing and usage analysis.
- **Conducted proof-of-concepts (POCs)** and pilot projects for emerging AWS services, evaluating scalability, performance, and operational impact to guide strategic cloud adoption

Cloud Engineer

Vancity – Toronto, Canada

February 2019-December 2021

-
- **Developed and maintained** automated CI/CD pipelines for cloud-based applications using **Jenkins**, integrating with **GitHub, Maven, SonarQube, Nexus, and Ansible** to streamline build, test, and deployment workflows.
 - **Executed cloud migration initiatives**, successfully moving servers, databases, and workloads from on-premises environments to **AWS** using **AWS Application Migration Service (MGN), Server Migration Service (SMS), and Database Migration Service (DMS)** to improve scalability and resilience.
 - **Authored and optimized Docker files** to build lightweight, secure, and reusable **container images**, and managed **private repositories** on **Amazon ECR** and **Docker Hub** for efficient image distribution.
 - **Automated infrastructure provisioning and configuration** using **Terraform** and **Ansible**, deploying and managing resources such as **VPCs, EC2 instances, EKS clusters, IAM roles, S3 buckets, ELBs, Auto Scaling Groups, and security groups**.
 - **Implemented advanced monitoring and observability** by deploying **Prometheus** and **Grafana** (via **Helm**) for infrastructure metrics, and leveraging the **ELK stack (Elasticsearch, Logstash, Filebeat, Kibana)** for centralized log management and analytics.
 - **Utilized Python and Bash scripting** to automate cloud operations, including application deployments, custom monitoring, and routine maintenance tasks across AWS infrastructure and web servers like **Apache** and **Tomcat**.
 - **Built a fully automated infrastructure CI/CD pipeline** integrating **Jenkins, Terraform, GitHub, Slack**, and security scanners such as **Checkov** and **tfsec**, ensuring compliance and early detection of misconfigurations.
 - **Led incident response and troubleshooting efforts**, leveraging **PagerDuty** and **Datadog** for alerting and real-time monitoring to ensure high availability and rapid resolution of production issues.

BUSINESS& IT SUPPORT

Qrios Networks Limited

December 2014 – October – 2018

- Managed Windows and Linux servers, ensuring uptime through regular monitoring and maintenance.
- Created users and email accounts for users and newly hired on Active Directory.
- Managed users' access on various map drives as instructed by IT manager.
- Set up scan to email, installed, configured, and deployed Xerox and HP printers.
- Developed step-by-step training manuals for end-users to ensure a seamless transition following application upgrades.
- Set up workstations with computers and necessary peripheral devices (routers, printers, etc.).
- Configured and maintained network infrastructure, including switches, routers, and wireless access points, resulting in a decrease in network downtime.
- Automated routine tasks using scripting languages, reducing manual work.
- Provided technical support to help desk personnel and end users, resolving system and application issues. Managed user accounts and profiles using Active Directory.
- Performed software installations and upgrades, ensuring systems are up to date with the latest security patches

EDUCATION

Bachelor's degree in computer science
Cross River University of Technology

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Hashi Corp Certified: Terraform Associate
