PROFESSIONAL SUMMARY

Accomplished Technical and Network Support Engineer level 1 for 3 years for end users, Systems Engineer for 1 year, and Network Engineer for 20 years to provide stable and healthy business operations. Deliver with proper support on site and remote users. Enforce IT company policy to maintain network security.

Handle company products and provide support for clients. Ability to learn and adapt new technology for continuous career development. Collaborate with the team to provide superb customer service. Managed to complete the project within deadlines as per customer requirements.

PROFESSIONAL EXPERIENCE

Network Analyst, Conestoga College Institute of Technology & Advanced Learning – dates (10/23 to Current)

Duties and Responsibilities:

- DHCP Windows servers Administrator and SolarWinds servers for Network Monitoring.
- Manage effective and stable operation of the college's voice/data communication.
- Manage Aruba Central Airwave, Mobility Manager, Mobility Devices, ClearPass and CX Switches.
- Support College Wireless client printers, mobiles, laptops, and IoT devices.
- Install, manage, and proactively monitor the UPS devices and replace the battery if needed.
- Configure APs and Switch devices for a new site and install switches on-site, including cable patching with labelling according to the college's standard design.
- Proposed to decommission end-of-life devices and replace them with new ones.
- Document current network infrastructure and design changes as a baseline for reference during troubleshooting and future changes.
- Assess and review recurring incidents and look for a permanent solution.
- Provide recommendations and improvements in a team meeting and share ideas for a better understanding and collaboration with team members.

Highlights:

- I successfully deployed Aruba Central, Access points, Ruckus switches, UPS, APs, and ClearPass servers at Conestoga's new campuses.
- I successfully migrated the Aruba Airwave from version 8.2.15.1 to 8.3.0.4
- I boarded Airwave TACACS+ authentication to ClearPass.

TECHNICAL SKILLS

INDUSTRY EXPERTISE

- Cisco
- F5
- Juniper
- Checkpoint
- Palo Alto
- Fortinet
- HPE Aruba Networks

TECHNICAL SPECIALIZATIONS

- Cisco Wireless Networks
- Aruba
Central/Airwave/Clearpass/Wi-Fi/AP
- F5 LTM, APM, Viprion
- Cisco/Fortinet/Checkpoint/Palo Alto Firewalls
- NACVIEW
- VEEAM Backup
- EXAGRID Backup Storage

Specialized Computer Analyst, Cree Board of Health and Social Services James Bay – dates (04/22 to 10/23)

Duties and Responsibilities:

- Provide IT solutions based on the CREE HEALTH BOARD requirements, according to the standard design documents. It includes integrating new IT solutions into the existing environment, such as Wireless Network Infrastructure, NACVIEW, VEEAM Backup, EXAGRID Backup Storage, SYSLOG servers, switch refresh, and Fortinet Firewalls deployed.
- Perform an audit of network configurations to ensure they comply with the company's standard configurations and security policies.
- Document new and existing Detailed Designs based on the proposed design and existing network infrastructure. Prepare a detailed change plan, with the approval of the change management team, and implement the procedure according to the approved change.
- Document to maintain the firewall rules list currently open, plan the request for new firewall rules changes, implement firewall rules based on company policy standards, and work with teams involved with incidents related to connectivity and troubleshoot by checking real-time logs on the firewalls or from the Syslog server.
- Prepare the router, switch, and wireless configuration based on the baseline standard design.
- Maintain the current network infrastructure of the CREE HEALTH BOARD.
- Participate in network/systems operations and monitor the current network. Provide level 3 support for 1st and 2nd-level technicians and work on all network operations service requests, incidents, and problem tickets by the ITIL process.
- Update the SolarWinds network monitoring database to add and remove nodes. Change the network diagram after the LAN and WAN tech refresh to ensure the map is current.
- Manage, support, and deploy SimpliVity server Gen 10 to replace the legacy ESXi servers.

Network Implementor/Engineer, CGI – dates (06/18 to 04/22)

Duties and Responsibilities:

- Provide L3 support for high-priority tickets and guide and supervise team members.
- Install, maintain, and upgrade all hardware, firmware, and software.
- Apply patches or perform minor upgrades on all software used.
- Create, review, and implement firewall rules.
- Deploy new Firewalls, Loadbalancers, WLCs, Switches, MSEs, and Cisco Prime in case of hardware failure or software corruption.
- Prepare change requests and implement firewall rules on Fortinet, Cisco ASA/Next Generation, VMWare NSX, and Palo Alto firewalls.
- Work with daily incidents, requests, and tasks related to VPN access (Cisco and F5 APM SSL VPN), switch port configurations, Routing and Switching, Cisco WLAN/Prime Networks, Cisco MSE, Cisco ACS and ISE for Radius and Tacacs+, F5 LTM/ASM/iRules/vCMP configurations.
- Evaluate and review changes to be implemented in the Production or Non-Production environment.
- Design wireless network diagrams and implement and integrate them into the existing infrastructure.

Highlights:

- I implemented Wireless Project refreshes such as AP commissioning, Predictive Survey, and Implementation.
- I successfully rebuilt Cisco Prime 3.1.7 servers with MSE and WLC.
- I deployed new virtual Cisco Prime server versions 3.4 to 3.9.

- I deployed virtual Cisco DNA servers.
- I upgraded and deployed ASA and NGFW Firepower Firewalls.
- I upgraded and provisioned the F5 vCMP guest from the Viprion Chassis.

Senior Network Engineer/Administrator, HCL Insys PTE. LTD. Singapore – DATES (11/12 TO 04/18)

Duties and Responsibilities:

- Conduct Face-to-face and Telephone interviews with new applicants for HCL's upcoming projects.
- Part of the Transition team will take over new or existing infrastructure to be part of HCL-managed devices.
- Collaborate with third parties involved to manage the problem for a quick resolution.
- Install, maintain, and upgrade all hardware, firmware, and software.
- Apply patches or perform minor upgrades on all software used.
- Provide technical support and advice on all the hardware and software used in the operating environment.
- Fine-tune network system parameters and configure firewall rules and VPN profiles.
- Document and maintain configurations of all hardware and software used in the operating environment for customer satisfaction.
- Create/maintain system/user accounts and assign appropriate access rights.
- Perform regular housekeeping of directories, files and routine configuration backup.
- Perform network and component recovery; Perform troubleshooting and resolve network problems.
- Liaise with the ISPs and any other service providers on operational matters.
- Analyze network utilization patterns, problems and recommend implementing corrective and preventive measures.
- Recommend new/improved hardware, software, and configurations to enhance system performance and management.
- Evaluate new hardware and/or software for implementation in the operating environment when required.

Technical Consultant, NCS Singapore – DATES (05/10 TO 11/12)

Duties and Responsibilities:

- Create or propose Detailed Designs for the client's new and existing sites according to the standard design documents.
- Document new and existing Detailed Designs based on the proposed design and existing network infrastructure.
- Coordinate with the client during the kick-off meeting to provide the current requirements and meet the company standard design for the new and existing equipment, including WAN link commissioning, data center readiness, Cabling, Power Supply, and Onsite Support.
- Prepare router, switch, and wireless configuration based on client baseline standard design.
- Prepare proof of concept based on the client network design and configuration for testing.
- Remotely configured and set up network switches, routers, and wireless according to the standard baseline configuration.

Technical Consultant, Emerio (Malaysia) Sdn Bhd – DATES (09/08 TO 02/10)

ITO SVR Delivery Consultant II, HP Malaysia Sdn. Bhd. – DATES (02/10 TO 05/10)

Position: Shift Lead

- Manage and monitor the Firewall team mailbox for high-priority issues and address all emails that are replied to or dealt with by relevant staff.
- Monitor Firewall team ITSM and RMT queues and ensure high priority is assigned to current shift engineers, work log is updated daily, and relevant technical troubleshooting is documented.

- Monitor Firewall devices such as Checkpoint and Cisco ASA. Create an ITSM ticket for alerts pertaining to the firewall node down or alarm issues.
- Create a Shift handover after the shift, highlight high-priority issues that need to be addressed and resolved.
- Implement Firewall requests in Checkpoint and Cisco ASA firewalls.
- Add new and old Firewall devices in monitoring, advise to create ICM for necessary changes.
- Collaborate with other team members for live troubleshooting, including partners or collaborators and other related parties, to be able to resolve connectivity issues.

Team: LAN

- Implement LAN orders in HP and Cisco switches for new servers.
- Implement VIP orders in Nortel Alteon and Cisco ACE load balancers.
- Implement the ICM on HP and Cisco switches for the decommissioned server.
- Implement DNS requests for adding, editing and deleting DNS records.
- Implement adding a DHCP scope for the new subnet in the parent DHCP server.
- Implement DHCP request to reserve a static IP for production servers.
- Monitor the LAN team mailbox for high-priority issues and queries.
- Monitor LAN team RMT queues for incident and connectivity issues.
- Monitor LAN Core, Layer 2 switches (Cisco and HP) and Load Balancers (Nortel Alteon and Cisco).

CERTIFICATIONS

VENDOR	CERTIFICATION	VALIDATION NUMBER	EXPIRY DATE
Microsoft	Microsoft Certified: Azure Fundamentals	Certification number: 3F54EE-A35D19	No Expiration

EDUCATION

Bachelor of Science in Computer Engineering, AMA Makati Computer University, Cisco Networking
Associate degree, AMA Computer Learning Center, Binan, Laguna, Programming languages

TRAINING ATTENDED

AWS Solutions Training for Partners: Migrating to AWS - Technical (Classroom)
Clearpass – Aruba Workshop
Peak Performance SASE workshop – HPE Aruba Networking

TECHNICAL SKILLS

SKILL	NUMBER OF YEARS	SKILL LEVEL*
Technical skills		
WLAN/LAN/WAN/Firewall network design, integration, and implementation	7	4
