- IT Administration – As part of my daily duties, I also carried out user account management, hardware and software management, demand management, change management, budget management, license management, and asset management and asset tracking. In this capacity, I used several software applications such as MS Active Directory, Microsoft EntraID, Microsoft Dynamics 365 Finance and Operations
- In this role, I gained familiarity with the following applications and services: Microsoft Admin Center, Microsoft Office365, Azure, Windows 10 & 11, Windows Server 2012, Okta SSO, Active Directory, Microsoft Lifecycle Services, Azure DEVOPS, ServiceNow and Freshservice and other ticketing systems, All-stream IP Phone management and others.

Information Systems Assistant
Thunder Bay District Health Unit

October 2020-December 2022
Thunder Bay, Ontario, Canada

In this role, I reported to the Information Systems Manager Phil Avella. My duties were as follows:

- Supported the Manager of Information Systems in the set-up and configuration of hardware and software for individual workstations.
- I acted as the first contact for staff experiencing difficulties with the information systems and helped in providing solutions to various problem.
- I assisted in the training of all staff on a variety of information technologies including computer software/hardware and telecommunication systems including the development of instructional and training materials.
- I routinely administered and maintained a backup of programs and data for security and restoration purposes.
- I maintained an accurate and up-to-date inventory of software/hardware, as acquired, and provide appropriate reports, as requested.
- To assist in network operating system maintenance, as required.
- Kept current in technological advancements.
- Ensures maintenance of Ministry of Health software used in the Thunder Bay.
- In this role, I gained familiarity with the following applications and services: Windows Server 2012, Active Directory, Veam Backups, Exchange 2010 and 2016, Security Explorer, Service Desk, PaperCut, Cisco Unity and Cisco Configuration Management Database, and others.
