OVERVIEW

- Experienced with working within a government corporate office environment and within educational institutions, both within a central office environment and within individual schools with staff and students.
- I always endeavour to offer top-notch support, especially to end users who are frustrated with their computer issues.
- Experienced in analyzing, researching, and acquiring needed hardware and software.
- Experienced in purchasing, configuring, deploying, managing, and troubleshooting smartphones.
- Microsoft Intune/Endpoint Manager, System Center 2012 R2 deployment with Configuration Manager 2012 R2 and Operations Manager 2012 R2.
- Team Lead in Microsoft System Center 2007 R3 at Wolf Creek Public Schools and 2012 at Chinook's Edge School.
- Experienced in working with and delegating tasks to fellow support analysts at Wolf Creek and LAN Techs and in-school Tech-EAs at Chinook's Edge to provide the highest level of service to our end users.
- Microsoft Certified Professional.
- A+ Certified.
- I've been trained at NAIT in the highly intensive Network & Security Support Analyst (NSSA) course featuring the core MCSE Microsoft requirements for Windows XP, Windows Server 2003, Active Directory, Network Security & Infrastructure—Planning & Implementing + much more, including Linux+, A+, and various firewalls.
- I always keep up to date with the latest Windows Server and workstation operating systems, implementing and using such technologies both in my virtual lab environments and in the workplace, while retaining my knowledge of previous operating systems that may still be in production.
- Trained in Cisco's CCNA
- Many years of actual experience in the computer field, including excellent keyboarding skills
- General office skills such as communication, interpersonal skills, a strong work ethic, team skills, analytical & organizational skills.

INFORMATION TECHNOLOGY SKILLS

Computer software

- Expertise in the optimization and mass deployment of operating systems and software to servers and end-user desktop computers.
- I offer top-notch end-user computer support.
- Experienced in managing Microsoft Exchange Server 2003, 2007, 2010, 2013, Office 365, Microsoft Unified Communications/Lync/Skype for Business VOIP solutions.
- Microsoft Office—all versions.
- Microsoft Windows XP through 11, a little bit of Linux (desktops and Server) and Mac OS.
- Effective programming abilities in PowerShell, VBScript, and some JavaScript.
- Experienced in managing and implementing virtualization hypervisors such as VMware ESXi w/wo VCenter, and Microsoft Hyper-V servers.

Internet & network technology

- Able to successfully assemble, configure and maintain Windows Servers and workstations including DNS, Domain Controllers, Active Directory, POP3/SMTP, DHCP, IIS, NAT, VPN, interfacing, routing and remote access, file and print servers, as well as group policies and related scripts.
- I have a firm grasp on the concept of subnetting, routing, and various network protocols required for different applications.
- I am familiar with configuring and implementing wireless technologies, including setting up encryption and SSIDs.
- Able to make good use of various remote tools, such as RDP, VNC, SSH, MMC snap-ins, etc.

Other computer related skills

- Proficient in installing, diagnosing, replacing and repairing most computer hardware and peripherals.
- Able to configure network routers, switches, interface cards, and other related computer networking equipment.
- Familiar with setting up backup systems and retrieving the data from such backup systems.

EDUCATION

Network and Security Support Analyst (NSSA) course at the Northern Alberta Institute of Technology (NAIT) in Edmonton, AB.

- This course includes the following MCSE courses:
 - 70-270: Installing, Configuring, and Administering Microsoft Windows XP Professional
 - 70-284: Implementing and Managing Microsoft Exchange Server 2003
 - 70-290: Managing and Maintaining a Microsoft Windows Server 2003 Environment
 - 70-291: Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure
 - 70-293: Planning and Maintaining a Microsoft Windows Server 2003 Network Infrastructure
 - 70-294: Planning, Implementing and Maintaining a Microsoft Windows Server 2003 Active Directory Infrastructure
 - 70-298: Designing Security for a Microsoft Windows Server 2003 Network
 - 70-299: Implementing and Administering Security in a Microsoft Windows Server 2003 Network
 - MOAC 70-350: Microsoft ISA Server 2004
- The NSSA program also included the following CompTIA courses:
 - A+
 - Security+
 - Linux+
- Also included was Cisco's CCNA.

Technical Courses

- Planning, Implementing, and Managing Microsoft System Center Configuration Manager 2007 R3 (2011)
- CommVault Simpana (2014)
- ITIL (2014)
- Windows PowerShell (2016)

RELEVANT EMPLOYMENT

IT Analyst

Mountain View County
(March 2020-March 2023)

- Provided top-notch end-user desktop support, both in-person and remotely.
- Purchased, configured, optimized, deployed and managed computer systems and mobile devices for end-users.
- Managed and created workflows, and troubleshooted issues with M-Files document management system.

- Managed, packaged, and mass-deployed and mass-configured software, group policies, and scripts via Active Directory and Microsoft Endpoint Manager.
- Troubleshooted issues with video conferencing meeting rooms, such as Council Chambers.
- Offered specialized technological services for County executives and Councillors.

Systems Administrator

Olds College—Olds and Calgary campuses
(September 2013 to September 2016)

- Acquired, set up, and maintained servers (including patch management via SCCM 2012 R2), their operating systems (Windows (Server 2003, 2003 R2, 2008, 2008 R2, 2012, and 2012 R2), Linux (CentOS and Red Hat), VMware), their various server roles (DCs, DNS, DHCP, IIS, NPS (RADIUS), File & Print, etc) and their configurations including clustered services.
- Set up, supported, configured, and maintained VCenter, ESXi hosts, clusters, and various VMware guest Windows and Linux servers hosting a variety of many diverse specialty services.
- Set up, supported, and maintained Azure federated Active Directory; integrate Azure apps as required.
- Acquired, set up, configured, maintained, upgraded, maintained, and repaired physical servers and network storage including Dell Compellent, Dell MD series direct-attached and iSCSI SAN storage, obtaining support and replacing parts as needed.
- Developed and maintained user accounts and permissions creation and management.
- Developed, implemented, maintained patch management and policies via System Center Configuration Manager 2012 R2.
- Setup and maintained various Microsoft SQL databases for various front-end applications.
- Managed, administered, and maintained Microsoft Exchange Server.
- Developed various group policies for campus-wide systems management.
- Set up, configured, tested, maintained, and upgraded CommVault Simpana for on-site, remote, and off-site backup/recovery and disaster recovery scenarios.
- File and systems recovery as needed.
- Planned, implemented, and integrated new technologies as required.
- Set up and maintained a test environment for use in developing pre-deployment scenarios as well as working out solutions to various problems to analyze impact on other systems before implementation into our live environment.
- Integrated enterprise printing solutions through PaperCut.
- Assisted database administrator, enterprise applications administrator, network administrator, and front-line IT support staff whenever they required.
- Prepared systems audit reports whenever required.
- Developed and maintained service level agreements with our various stakeholders.
- Developed policies for the use and procedures of our systems on campus.

Local Area Network Technician

Chinook's Edge School Division No. 73
(August 2008 to May 2010 and February 2012 to September 2013)

- Front line of desktop support for staff and students throughout Chinook's Edge schools and offices.
- Set up and maintained server and workstation hardware, supported their software and operating systems
- Designed and deployed a new domain along with its Active Directory structure, supporting servers (such as file and print servers), group policies, scripts, etc.
- Designed and implemented group policies
- Created various security groups for various purposes and assigned appropriate permissions for various purposes, and of course, assigned user and computer accounts to the appropriate groups.
- Provided front-line support for school staff and students in the various schools I was assigned or sent to assist with.
- Terminated Ethernet cable to patch panels and wall jacks
- Configured and implemented network switches (including layer 3) and wireless access points and routers.
- Configured and maintained Sony PCS and Polycom HDX video conferencing equipment along with their supporting servers, namely their bridge (RMX 2000), converged media appliance (CMA 4000), video recording server (RSS 2000) and streaming media server (VMC 1000) and their edge devices (V2IU).
- Initially provided front line support for end users in this video equipment but was later moved to tier 2

support for all the heavier configuration and problem issues.

- Worked as an individual and also on various teams according to projects, including the initial stages of the Chinook's Edge virtual desktop project.

Support Analyst

Wolf Creek Public Schools (Division No. 72)

(May 2010 to January 2012)

- Team Lead of Microsoft SCCM 2007 R3, FirstClass email system, PowerSchool systems and Server 2008 R2 implementation.
- Was on the design team for SCCM 2007 R3 and implemented the final design and made adjustments along the way as necessary.
- Provided hands-on support to staff and students both at Division Office and end schools throughout the Division servicing hardware and software of the Division's server and desktop systems.

System Administrator

Hergott Duval Stack, LLP (June & July 2008)

- Filled in for their Systems Administrator for the 2 month duration.
- Maintained and optimized several Windows Server 2003 servers, including 2 domain controllers, 1 Microsoft Exchange Server 2007, 4 file servers, 2 terminal servers, an applications server, DHCP server, DNS services, and a backup server running Symantec Backup Exec.
- Configured, maintained, and supported an environment of 125 Windows XP workstations, several being laptop computers with docking stations.
- Provided support for Microsoft Office 2003 and 2007 as well as a vast range of accounting software including QuickBooks, CCH Taxprep, CaseWare Working Papers, Sage Simply Accounting, and some others.
- Provided hardware support.
- Installed and configured several workstations.

Tutor

Northern Alberta Institute of Technology (September 2006 to May 2007)

- Provide hands-on instruction and easy-to-understand explanation of the current NSSA program which includes all aspects of Windows XP, Windows Server 2003 and the technologies within them.
- Provide explanations and illustrations to make the Microsoft core MCSE courses understandable to students requiring assistance.

Information Technology Specialist

Trader Corporation (July 1999 to July 2006)

- Configuring, installing, troubleshooting, assembling and maintaining all computer systems and equipment including local & network printers, scanners, facsimile machines, switches and routers in Saskatchewan and Manitoba.
- Maintain several Windows 2003 Servers as well as Windows 2000 Servers.
- Administer the network, including creating security policies, group policies, scripts, users, remote access, VPNs, shares, and other related network administration duties.
- Attend and participate in several weekly national meetings regarding the constantly changing Trader websites, offering suggestions and sharing concerns.
- Keep our regional managers up to date with the latest developments in our websites and databases.
- Keep our company well informed with the latest developments in computer technologies, create reports why implementing such technologies would benefit our company as well as our customers, and then test, implement and train others on acquired technology.
- Processing advertisements and scanning photographs for the Auto Trader, Truck Trader, Antique Auto Trader, National Equipment Trader, Heavy Truck and Equipment Trader, and Buy & Sell publications.
- Developing, creating and operating computer programs for company use.
- Inputting and updating advertisements online.
- Assisting customers and staff with various computer problems in person, over the phone, and using remote tools.

MICROSOFT CERTIFICATE OF ACHIEVEMENT

This Certificate accredits that

Donavon Szydlowski

has successfully completed:

6451B: Planning, Deploying and Managing Microsoft (R) System Center Configuration Manager 2007

an Official Microsoft Learning Product as prescribed by

Microsoft Corporation.

Learning Solutions

Microsoft Certified Trainer

May 02, 2011

Part No. 098 103915

The Board of Governors of

The Northern Alberta Institute of Technology

by the authority vested in it, awards this

Continuing Education Honours Certificate

to

Donovan Szydlowski

in recognition of successful completion of a prescribed program of studies in

NETWORK & SECURITY SUPPORT ANALYST

Dated and issued at Edmonton, Alberta, Canada on the 30th day of June, 2007.
