

Christian J Barratt

Mississauga, ON | 416-303-1861 | cbarratt.dev@gmail.com | LinkedIn: www.linkedin.com/in/barradev

Professional Summary

Hands-on Systems & Network Administrator with a strong foundation in cybersecurity, network infrastructure, and full-stack development. Combines practical experience in post-incident network recovery, server administration, and secure architecture with scripting capabilities and end-user support. Proven ability to independently manage diverse IT environments, implement security controls, and automate processes to improve reliability. Currently holds Security+ and ISC2 CC certifications with experience in regulated operational environments.

Technical Skills

- **Systems Administration:** Windows Server (Active Directory, Group Policy, DNS, DHCP), Linux Administration, NAS Management, Print/Scan Services, Backup & Disaster Recovery
- **Networking:** LAN/WAN/Wi-Fi, VLANs, TCP/IP, VPN (Site-to-Site & Remote Access), Firewalls (Palo Alto, Cisco ASA, FortiGate), Switches/Routers, SD-WAN
- **Security & Infrastructure:** Patching & Vulnerability Management, Endpoint Protection, SIEM (Splunk, Elastic Stack), Security Frameworks (NIST, MITRE ATT&CK)
- **Scripting & Automation:** PowerShell, Python, Bash, Ruby
- **Cloud & Enterprise Systems:** AWS/Azure, MDM (JAMF), Ticketing Systems, Remote Access Tools (TeamViewer), CRM/ERP Support
- **Hardware & Support:** Workstation/Server Hardware, Cabling, Printers, Scanners, Mobile Devices (iOS), VoIP Systems

Professional Experience

IT Support Technician | Brokerhouse Distribution Inc, Etobicoke, ON | 02/2025 – 06/2025 (Contract)

- Led post-cyber incident recovery of enterprise network infrastructure, including workstation and server hardware reintegration
- Reestablished connectivity between national office branches via VPN and WAN configurations to restore standard operations
- Managed and deployed workstations, VoIP services, and IoT devices while implementing enhanced security controls
- Provided remote troubleshooting via firewall configuration and network device management for distributed locations
- Coordinated with external vendors to restore critical business systems and ensure compliance with operational requirements

IP Support Technician | LVMTech, Mississauga, ON | 03/2021 – 12/2023 (*Engaged through consecutive annual contracts*)

- Served as subject-matter expert for GPS telematics platform supporting fleet operations in a time-sensitive environment
- Diagnosed and resolved complex technical issues involving cellular connectivity, GPS accuracy, and vehicle data integration
- Supported hardware installations, configuration standards, and remote access solutions for distributed field devices
- Maintained detailed technical documentation and provided training to ensure system reliability and user proficiency

Full Stack Developer (Co-op) | FMRU Clothing, Toronto, ON (Remote) | 04/2020 – 12/2020

- Developed and maintained internal web applications using HTML, JavaScript, and Ruby on Rails
- Implemented automation scripts to streamline system monitoring and data collection processes
- Translated user requirements into technical implementation plans with focus on system reliability
- Monitored technical performance of internal systems and provided tiered support for application functionality

Education & Certifications

Lighthouse Labs, Toronto, ON

Diploma, Cyber Security | 02/2024

- **CERTIFIED IN CYBERSECURITY (CC)** - ISC2 (2024)
- **CompTIA SECURITY+ CE CERTIFICATION** - CompTIA (2025)

TriOS College, Mississauga, ON

- **Advance Diploma** - Enterprise Web & Mobile Developer | 09/2020
- **CompTIA certifications** - CompTIA A+ and CompTIA Network+ | 04/2022

Projects & Technical Environment

Homelab: Enterprise Network & Systems Simulation

- Built and maintains a segmented Proxmox-based homelab with Windows/Linux servers, NAS storage, and VLAN segmentation
- Configured and manages Active Directory Domain Services, Group Policy, DNS, and DHCP services
- Implemented site-to-site VPN connections between segmented networks and configured firewall rules (pfSense)
- Automated system deployments and patch management using PowerShell and Bash scripting
- Deployed Elastic Stack (ELK) for log aggregation and security monitoring across virtual infrastructure

Cybersecurity Capstone: Incident Response & Remediation

- Conducted comprehensive security assessment of simulated e-commerce environment using NIST framework
- Developed incident response report detailing containment, eradication, and recovery procedures for data breach scenario
- Presented technical findings and mitigation strategies to industry panel, emphasizing practical implementation
- Created detailed documentation for security controls, backup strategies, and disaster recovery procedures

Regulated Environment Experience

- Gained exposure to operational requirements and security considerations in commercial retail and distribution environments
- Implemented access controls and monitoring procedures post-incident to enhance security posture
- Familiar with compliance considerations and systematic approaches to maintaining secure, auditable IT operations
