- Predictive Modelling & Scenario Simulation
- Risk & Compliance Support
- Process Automation Tools
- Cross-Functional Team Collaboration
- Data Analysis, Reporting & Visualization
- Workflow Optimization & Process Mapping
- Root Cause & Variance Analysis

PROFESSIONAL EXPERIENCE

Assistant Manager | GAP Inc. | Hamilton, ON

May 2025 – Present

Assisting in leading operations, coordinating scheduling, and supporting team development to align with corporate KPIs and customer service standards.

Operational Risk Analyst Intern | Fairstone Bank | London, ON

May 2024 – Aug. 2024

Led cross-functional risk assessments and data analysis aimed at enhancing risk management and compliance strategies. Played a crucial role in ensuring seamless risk data migration, including conducting risk and control self-assessment (RCSA) workshops, all while functioning as a cover for the Senior Data Analyst due to the vacant position.

- ✓ Aided in facilitating RCSA workshops for the Operations department following the successful migration of risk data to LogicGate to enhance risk tracking and operational security. Worked collaboratively with other departments to ensure coordinated implementation and established proactive and reactive strategies to maintain risk control.
- ✓ Managed a high volume of data, developed and managed Teams and SharePoint channels for all Branch Managers across the company (250+), streamlining product insights, branch communication and problem solving.
- ✓ Thrived at consistently identifying opportunities to enhance business processes and efficiency, including proposing the integration of AI into operations based on research and competitive analysis of other banks. This led to internal initiatives and policy development within the Operations department to investigate the potential for improved workflows resulting from AI implementation.
- ✓ Designed and implemented offline process documentation, including user manuals for proactive risk control, to support monthly branch reporting updates during unplanned system outages and disruptions, improving overall operational efficiency.

Assistant Manager | Sessions Cannabis | Hamilton, ON

May 2022 – Aug. 2022

Quickly progressed from a sales role into an Assistant Manager position due to an in-depth understanding of operations. Oversaw all aspects of business planning, including financial management, marketing strategies, inventory, and client relations.

- ✓ Actively engaged with customers to gain insights into their needs and product usage, analyzing customer data and sales trends to determine the most profitable product and most effective cross-selling strategy. Drove pricing and product strategy implementation to success, driving business growth while optimizing customer experience and enhancing profitability.
- ✓ Delivered comprehensive training on sales best practices, effective sales pitch techniques, and value-based delivery based on customer responses and feedback. This empowered the entire sales team, driving results and increasing sales targets.
- ✓ Streamlined numerous operational processes, including cash management and reconciliation workflows, improving work productivity and overall efficiency.

Cook | Union Jack Fish and Chips LTD | Hamilton, ON

Aug. 2020 – Nov. 2020

Prepared traditional meals to order, ensured food safety compliance, and collaborated with the front-of-house team.

Head Cashier | Forever 21 | Hamilton, ON

Oct. 2018 – Nov. 2019

Oversaw front-end operations, led cashier team training, and ensured a smooth checkout experience for customers.

Business Analyst Intern | Santos Dumont | Dublin, Ireland**June 2018 – Aug. 2018**

Gathered and cleaned aircraft utilization asset data weekly to forecast retirement timelines and identify sales/lease targets. Streamlined reporting by transitioning workflows from Excel to Power BI, boosting efficiency and performance tracking.

- ✓ Gathered and cleaned aircraft asset data weekly to forecast lease end and retirement timelines, asset lifecycle trends across managed fleet.
- ✓ Transitioned asset tracking workflows from Excel pivot tables to Power BI, improving dashboard performance, cross-team visibility, and reporting clarity to enhance collaboration between Technical, Commercial, Engines and Asset Management teams.
- ✓ Developed technical documentation and internal guides to support dashboard use and ensure transparent communication across aviation stakeholders.
- ✓ Supported commercial department stakeholders in analyzing global asset market data to identify leasing and sales opportunities, while also supporting commercial and technical teams with business cases and asset-specific campaigns.

Marketing & Operations Intern | Microsoft | Istanbul, Turkey**Sep. 2017 – May 2018**

Aided in managing logistics for 20+ corporate events and supported IT product training delivery, contributing to a 7% increase in national B2B product usage. Created event evaluation metrics and reporting frameworks to generate data-driven insights for future campaigns.

- ✓ Aided in the execution of several enterprise customer workshops, training more than 8,000 of their employees with a technology specialists' and customer support team at the customer's headquarters.
- ✓ Built experience in presentation and audience marketing by travelling to 13 universities, reaching out to more than 2,000 potential clients and start-up leads.
- ✓ Collaborated with cross-functional marketing and product teams to align event messaging with brand strategy, enhancing engagement and consistency across all touchpoints.

ACADEMIC ACCOMPLISHMENTS**Bachelor of Commerce - Management Co-op (Honours) | Fanshawe College | London, Canada****Sep. 2020 – Dec. 2024**Accomplishments:

- GPA: 3.75/4.2
- Graduated on the Dean's List of Honours

Relevant Coursework:

Business Intelligence | Applied Research Methods | Project Management | Marketing | Data Analytics | Applied Research Methods | Operations Management

Key Projects:**Customer Data Analysis Project**

Directed customer risk and pricing analysis using SPSS to test a new pricing strategy for a local entertainment business.

- Analyzed market and operational data, determined unnecessary customer charges, as well as proposed major areas or points of interest to attract new customers and increase the client base.
- Used predictive modelling in SPSS to support strategic pricing decisions and planning, increasing profit.

Market Analysis and Product Performance Project

Performed risk and demographic analysis to shape product launch strategy using A/B testing and segmentation.

- Explored numerous options to ensure new products met the target market's needs, gaining a complete understanding of customer demands, pain points, and industry trends to create a more tailored marketing strategy.
- Delivered top product profit/margin through strategic product planning and data-driven insights.

Bachelor of Materials Engineering Co-op | McMaster University | Hamilton, Canada**2014 – 2019**
