

SECURITY CLEARANCE

- Level 2 – Secret

CERTIFICATIONS

 **CompTIA** Security+ (In Training)

 **Cisco** [Cisco Certified Network Associate \(CCNA\)](#) – 2025

 **Fortinet** [Certified Professional \(FCP\) Network Security](#) – 2024

PROFESSIONAL TRAINING

 **Palo Alto (EDU-210) Firewall Essentials** - 2025

 **SSC IT Professional Development Program (ITPRO)**
Technical Advisor – In progress

EDUCATION

BASc in Computer Engineering
Concentration in Cyber Security
University of Ottawa

LANGUAGES

English – Professional Fluency
French – Intermediate (In-Training)

PERSONAL PROJECTS

Secure Home Lab

- FortiGate-50D, FortiWiFi-60D
- FortiAnalyzer-200D, FortiSwitch-108D
- Cisco ASA5505, Cisco2960/2811
- Cisco RV260
- Raspberry Pi 5 (Pi-Hole, MySQL DDNS)
- QNAP (Private Cloud)

Cisco Packet Tracer - Enterprise Network

Designed and configured an enterprise grade topology with redundancy (HSRP / VRRP), dynamic routing (OSPF, BGP), and security controls (ACLs, port security). Implemented VLANs, NAT, DHCP, STP, and trucking across routers, switches, and end devices to simulate a secure, resilient production environment.

Executive Summary

Experienced IT Security Professional with 4+ years in large-scale **enterprise network environments**, specializing in **Infrastructure Security Operations** within the Government of Canada. Expert in multi-vendor IT security technologies such as **Fortinet**, **Cisco**, and **Palo Alto** with proven success in firewall management, intrusion prevention systems (IPS), web application firewalls, Radware Load Balancers, VPN solutions, and Identity Access Management (IAM) solutions.

Proficient in **IT Service Management** practices such as incident response, change management, and 24/7 on-call support. Skilled in layer 2/3 routing, network traffic analysis, and troubleshooting complex network protocol issues using tools like FortiAnalyzer and Wireshark. Recognized for delivering **secure infrastructure solutions**, leading firewall migrations, hardware refresh, and producing detailed traffic and security reports that support **operational security and compliance**.

Skills

Firewalls

- FortiGate, FortiManager
- FortiWeb, FortiWifi
- Forcepoint Side Winder
- Cisco ASA5505
- Palo Alto PA Series

Security Technologies

- IPS / IDS
- Web Filtering, DNS filtering
- Application Control, Antivirus
- SSL/TLS Certificates
- IPsec VPN / SSL VPN
- HTTPS, SSH, SFTP, IPsec

Identity Access Management

- FortiAuthenticator
- AppGate

IT Service Management

- Incident Response
- Change Management
- 24/7 On-call Support
- IP Address Management (IPAM)
- Network Monitoring Fault Management (DX Spectrum)

Networking

- Routing (Layer 3) / Switching (Layer 2)
- TCP / UDP (Layer 4)
- Network Address Translation (NAT)
- VLAN, LAN / WAN, SD-WAN
- Load Balancing (Radware / F5)

Network Traffic Analysis

- Wireshark, Syslog
- FortiAnalyzer
- FortiGate Live Packet Capture
- Cisco Live Packet Capture

Operating Systems

- Linux/Unix
- Windows

Microsoft

- Office 365, Visual Studio

Programming

- C, C++, C#
- Python, Java, SQL
- Repositories - GitHub, BitBucket

Key Achievements

- Led and supported critical firewall migrations from **Forcepoint Sidewinder** to **Fortinet FortiGate** across multiple data center production environments to improve security posture.
- Built and delivered critical traffic reports on ESDC network to support executive decision making during the EPS onboarding project, enabling the secure migration of internet egress traffic to a new tenant environment.
- Developed and integrated Power BI dashboards and SharePoint sites to centralize reporting for Service Delivery Managers, improving visibility into business requests and enabling executives to track priorities, financials, and workload in real time
- Engineered a secure home lab environment using Fortinet, Cisco, Raspberry Pi (Pi-Hole DNS filtering), and private cloud to simulate enterprise-grade firewall, VPN, and traffic analysis scenarios to strengthen hands-on expertise in multi-vendor security technologies.

Work Experience

Mokhtar Zehrawi

Company : Shared Services Canada | Services Partagés Canada
Department : Enterprise Cyber Security Services / Connectivity and Security Services
Position : Network Analyst – (2022 January to Present)

Part of Infrastructure Security Operations - **Perimeter Firewall Team**

- Major experience in supporting Infrastructure Security Operations for large enterprise client (Employment Social Development Canada), securing both production and development environments that spans multiple geographically distributed data centers.
 - Collaborated with infrastructure, application, and operations teams to align network security controls with system requirements and service delivery objectives, operating within NIST-aligned enterprise and government cybersecurity standards.
 - Participated in infrastructure refresh and platform lifecycle activities, supporting firewall hardware and management platform upgrades to maintain secure and stable operations.
- Led a large-scale perimeter security modernization initiative, migrating legacy firewall platforms (Forcepoint SideWinder) to Fortinet NGFW solutions across multiple production data-center environments, improving performance, maintainability, and security posture.
- Implemented and maintained firewall flows to enforce policy governance and security for critical business application & service (CBAS) that is used by tens of thousands of Canadians.
 - Deploy and optimize Fortinet security profiles (IPS, Web-Filter, Application Control, AV) to protect mission-critical services such as MSCA, GCOS, AEM, IRS, and Job Bank.
- Delivered executive-level traffic, risk, and utilization reporting to support secure onboarding initiatives and data-driven security architecture decisions.
 - Produce actionable security and traffic intelligence reports consumed by senior technical teams and management for planning and decision-making.
- Supported high-availability network services including load balancing and centralized IAM solutions, improving application resilience and access governance.
- Reduced organizational attack surface by auditing and removing 100+ unused or obsolete firewall policies using traffic analytics and usage-based analysis.
- 24/7 on-call rotations to coordinate in top priority incident response, remediation and change management processes to ensure continuous service uptime.
 - Acted as a senior technical escalation point during high-priority incidents, performing root-cause analysis using packet-level diagnostics and traffic analytics to restore service availability.
 - Documented incident findings, remediation actions, and lessons learned to support continuous improvement.

Company : Shared Services Canada | Services Partagés Canada
Department : Client Service Delivery & Management – Citizen & Business Branch
Position : Data Analyst – (2021-May – 2022 Jan)

- Improved operational efficiency by designing standardized reporting processes and tools, increasing visibility into project delivery and team capacity.
- Developed executive-level dashboards and reports using Excel and Power BI, enabling data-driven decision-making and improved governance oversight.
- Led the design and deployment of centralized SharePoint reporting hubs, establishing a single source of truth for project and operational data.
- Facilitated recurring project review and issue-resolution meetings, supporting leadership in prioritizing high-impact initiatives and risks.
