EDUCATION

University of Maryland, Baltimore County

Maryland, United States

Master of Science in Cybersecurity, August 2023 – May 2025

GPA: 3.661/4

Courses: Introduction to cybersecurity, Enterprise Security, Managing cybersecurity operations, Cyber warfare, Risk analysis and compliance, global cyber capabilities and trend, cybersecurity laws and policies and cybersecurity project

Institute of Engineering and Technology

Indore, India

Bachelor of Engineering in Information Technology, August 2019-May 2023 Cumulative GPA:

7.94/10

Courses: Operating Systems, Computer Networks, Database Management Systems, Data Structures and Algorithms, Distributed Systems, Cloud Computing, Computer Architecture, Object Oriented Programming, Software Engineering, Artificial Intelligence, Machine Learning, Web Technologies.

SKILLS

Operating Systems – Linux, Windows, IOS

Security Tools – Wireshark, Metasploit, Suricata, Nmap, Nessus, Burp suite, Snort, Aircrack-ng, OWASP ZAP

Governance, Risk and Compliance – Risk Management, Compliance Management, Security Policy Development, Audit and Assessment, Regulatory Compliance (GDPR, HIPSS, CCPA, PCI-DSS, etc.)

Cybersecurity Technical Skills – Penetration testing, Information Security, Risk management, Data encryption, IoT security, Application security, Cryptography, DDoS prevention, Zero-day exploit, prevention Social Engineering, Firewall Management

PROFESSIONAL EXPERIENCE

AI Analyst June 2025 – Dec 2025 USA, Maryland

- **Applied machine learning and data analysis techniques** to detect patterns, anomalies, and behavioral trends in large datasets, demonstrating transferable skills for AI-driven sports performance, fan engagement, and media analytics.
- **Leveraged cybersecurity and network traffic analysis tools** (Wireshark, Zeek, SIEM) to process real-time data streams, showcasing the ability to monitor, interpret, and secure high-volume digital media and analytics platforms.

Soft Spectrum Technology, Cyber Security Analyst 08/2022 - 07/2023

Indore, India

- Provided **technical support** for troubleshooting issues related to security systems and networks.
- Analyzed network traffic logs, firewall logs, **intrusion detection system alerts, and antivirus** reports to identify potential threats.
- **Implemented firewalls** and other security measures to protect data from external threats.
- Built firewalls and encrypted data to secure confidential information.

PROJECTS

Blockchain Implemented E-Voting system

- Configured nodes on private networks according to best practices for security, scalability, and performance.
- Performed security assessments and control matrix reviews to evaluate blockchain processes and risks.
- Analyzed blockchain threats with thorough reviews of untested code and unprotected keys.
- Created smart contracts to facilitate secure transactions on the blockchain platform.

IoT Device Security Monitoring

- Used Zeek and Wireshark to capture and analyze IoT device network traffic for anomaly detection.
- Implemented TLS-based encryption for secure data transmission between IoT devices and the network.
- Configured a monitoring dashboard to display alerts and logs for potential security breaches in IoT devices.

Ransomware Detection System

- Implemented anomaly detection algorithms to monitor file access patterns and detect suspicious encryption activity.
- Trained a supervised learning model using labeled datasets to classify ransomware behavior accurately.
- Configured SIEM integration to log all events and generate real-time alerts for security teams.

CERTIFICATIONS

CompTIA Security+, Successfully attained the CompTIA Security+ certification, showcasing comprehensive knowledge in cybersecurity principles and best practices. Equipped with skills in threat identification, risk management, and securing IT infrastructure to contribute effectively to organizational security objectives.

Completed EC-Council Network defense essentials and Digital forensic essentials certificates.
