PROFILE

A proficient multitasker with demonstrated organizational hierarchy and public relations skills, as well as good communication abilities, characterizes this technical support specialist. competent in programming languages, TCP/IP, MySQL, and improving team performance while maintaining high standards.

HIGHLIGHT OF QUALIFICATIONS

- Bachelor of Information Technology (Computer and Communication Networks), Centennial College.
- Strong knowledge of networking, switching & routing, wireless and enterprise network design.
- Proficient in Linux/Unix and Windows Server, with experience in network security and system scripting.
- Programming experience in C/C++, Python, Java, C#, Bash, and PowerShell.
- Hands-on experience with virtualization (VMware), cloud infrastructure, VoIP, and converged networks.
- Skilled in project management, business analysis, and applied research.

EDUCATION

Bachelor of Information Technology (Computer and Communication Networks), Honours
Centennial College, Toronto, ON **(Sept 2022-Present)**

GPA – 4.0

Relevant Coursework: Computer Networking, TCP/IP, Routing & Switching, Wireless and Converged Networks, Linux/Unix & Windows Server, Network Security, Virtualization & Cloud Infrastructure, Object-Oriented Programming, SQL/Oracle Databases, VoIP Systems, Project Management.

PROJECTS

- Corporate Network Design & Implementation: Designed and deployed a scalable network infrastructure using Cisco routers/switches, OSPF, and EIGRP, improving efficiency. **(April 2023)**
- Database Design & Modelling: Developed a relational database system using MySQL and Oracle, ensuring 99.9% data integrity and reducing redundancy. **(December 2023)**
- Dynamic Website with API Integration: Built a dynamic website integrating RESTful APIs for live tracking, optimizing backend-to-frontend data exchange with a 25% performance boost. **(April 2024)**

RELEVANT WORK EXPERIENCE

Student Researcher Wireless Technology

Centennial College Innovation Hub

(November 2024 – May 2025)

- Developed a low-latency Vehicle-to-Vehicle (V2V) communication system using UNEX SOM-352UC C-V2X modules and Raspberry Pi.
- Implemented C/C++ firmware and Python scripts to capture, process, and transmit real-time OBD-II vehicle data.
- Enabled IEEE 802.11p C-V2X communication for wireless exchange of safety-critical vehicle information.
- Performed ARM cross-compilation and embedded Linux deployment, resolving x86–ARM compatibility issues.
- Configured TCP/IP networking, routing, NAT, and SSH to ensure reliable multi-device communication.
- Integrated vehicle data with a blockchain-based decentralized ledger for secure and tamper-evident logging.

Co-Op Lab Assistant SETAS

Centennial College, Progress Campus, Scarborough

(April - August 2024)

- Maintaining, installing and configuring software on computer systems
- Ensuring computer, networking and telephony systems are functional and operational
- Resetting Switches and Routers after every labs
- Monitoring for Open Lab sessions in the ICET computer labs
- Special projects, testing and maintaining lab equipment, reinstating system
- Helping Professors when needed in the Labs
- Documenting technical issues and resolutions to improve response times and create a reference for future troubleshooting.
- Updating system software, applications, and drivers to maintain compatibility and security.
- Providing technical support to students and staff, troubleshooting hardware and software issues promptly.
- Imaging computers and hardware to deploy standardized configurations, software, and security protocols across all lab devices, streamlining setup processes and ensuring a seamless, secure experience for all users.

IT Assistant

Kanan International Pvt. Ltd., Gujarat, India

(March - August 2022)

- Provide technical support to end-users for hardware and software issues.
- Troubleshoot and resolve IT-related problems.
- Support in managing and maintaining databases related to student information and applications.
- Assist in data entry, data cleansing, and ensuring data integrity.
- Collaborate with senior IT staff to ensure network security.
- Help in maintaining and updating the organization's website.
- Assist with content management and ensure the website is up to date.
- Stay informed about the latest trends and technologies in IT.
