Professional Summary

Security-focused IT Security Analyst with 3+ years of experience in Security Operations Center (SOC) functions, including SIEM monitoring, threat detection, incident response, malware analysis, vulnerability management, and cloud/on-premises security operations. Skilled in analyzing security events, triaging alerts, correlating logs, and escalating incidents according to defined workflows. Strong knowledge of threats, attacks, IDS/IPS, endpoint protection, deep packet inspection, networking protocols, Windows/Linux systems, and mobile platforms (iOS/Android). Security+ certified.

Core Competencies

Category	Skills and Technologies
Security Operations	SOC monitoring, alert triage, incident response, threat detection, malware analysis, log correlation, workflows for security and escalation, MSSP collaboration
SIEM & Monitoring	Microsoft Sentinel, Netskope, Rapid7 InsightVM, Defender XDR suite, intune
Endpoint & Network Security	EDR, anti-malware, IDS/IPS, deep packet inspection, network threat analysis, privileged account monitoring
Cloud & On-Prem Security	Hybrid microsoft domains, microsoft 365 security, azure, hybrid cloud monitoring, IAM identity security, conditional access, zero trust, MFA enforcement
Operating Systems	Windows 10/11, Windows Server, Ubuntu, Red Hat, Arch Linux
Networking	OSI model, TCP/IP, DNS, SMTP, HTTP/S, VPN fundamentals
Mobile & MDM	NinjaOne and Intune for desktop, iOS, android, and other endpoints
Scripting & Automation	Powershell, bash, python, REST APIs
Compliance & Governance	CIS, ISO 27001/27002, endpoint compliance, policy development, documentation
Reporting & Analytics	Power BI, Power Query
Soft Skills	Written communication, troubleshooting, collaboration, organization, highly adaptable and versatile

Professional Experience

Ag Growth International (AGI) — Winnipeg, MB

Information Technology Security Analyst | June 2022 – Present

- Monitor and analyze security events across cloud-based and on-premises environments using Microsoft Sentinel, Defender XDR, Netskope, and Rapid7 InsightVM.
- Perform first-level response for security incidents including intrusion attempts, malware detections, anomalous user behavior, endpoint alerts, and identity-related threats.
- Conduct threat monitoring, log analysis, and event correlation to determine impact, scope, and required remediation actions.
- Follow defined incident response workflows, escalating events to senior analysts or MSSP partners as needed.
- Use automated malware analysis tools to evaluate suspicious files and determine threat impact.
- Support administration, configuration, and tuning of security tools to improve detection accuracy and reduce false positives.
- Develop and maintain security documentation, including monitoring procedures, incident handling steps, and compliance workflows.
- Led a major MFA compliance initiative, increasing adoption from 70% to 99% in one week through targeted communication and policy enforcement.
- Executed an endpoint security compliance project that improved software compliance by 50% within two weeks.
- Create detailed dashboards and analytics for executives and technical teams using Power BI and Power Query, utilizing REST APIs to connect to large raw datasets and log volumes, developing interactive dashboards and reports with KPIs and curating clear actionable information.
- Collaborate with infrastructure, cloud, and Service Desk teams to resolve security-related issues and support enterprise security operations.

Information Technology Security Analyst – Intern | May 2022 – June 2022

- Supported SOC functions including incident triage, threat analysis, and vulnerability review.
- Assisted in developing security policies, procedures, and documentation.
- Monitored security alerts and participated in threat intelligence activities.
- Managed and prioritized Jira tickets related to security operations in a fast-paced environment.

Certifications

CompTIA Security+ (2022) | CCNA (2021) | CompTIA A+ (2020)

Education

Cyber Defence & Cloud Administration Diploma

MITT | 2020–2022 | GPA: 4.2 / 4.5

Relevant coursework: Windows Server, Linux Administration, Network Monitoring & Traffic Analysis, Digital Forensics, Python, CCNP ENARSI, Firewalls (Palo Alto, Check Point), PenTest+, Security+.
