PROFESSIONAL VALUE

Experienced IT professional with a solid academic foundation in Computer Science, offering expertise in Systems Analysis and Design, Database Management Systems and Computer Networking. Proficient in multiple programming languages and skilled in problem-solving. Fluent in English and French, with a strong track record of delivering valuable insights and driving business success through innovative solutions.

RELEVANT SKILLS

System Analysis and Design:

- Proficiency in programming languages such as C#, C/C++, Python as well as web development technologies like .NET, HTML, CSS, PHP, and experience with JavaScript.
- Adept at Agile principles and practices, including frameworks such as Scrum, Lean, and Kanban.
- Proficient in collaboration throughout the SDLC to ensure the delivery of high-quality systems.
- Adept at utilizing version control tools such as Git to facilitate software engineering and peer code review.
- Skilled in applying CI/CD practices to deliver bug-free and robust code

Database Management Systems:

- Make use of SQL Server and MySQL for the purpose of designing and administering databases.
- Compose intricate queries utilizing Relational Algebra prior to implementing them in SQL.
- Utilize SSRS and SSMS for developing visual reports created from query results.
- Proficient in utilizing T-SQL functions and stored procedures to perform advanced tasks such as aggregations or data transformations.

Computer Networking:

- Capable of overseeing and upholding the network infrastructure of the organization, which encompasses the local area network, routers, and switches.
- Possessing strong expertise in handling and efficiently managing IIS servers and SSL certificates for secure and reliable hosting of web services, web applications, and websites on Windows operating system.
- Implement networking security measures, such as authentication, encryption, and firewalls, to protect against threats and vulnerabilities.

Technical Support:

- Conduct remote technical support using secured remote support software.
- A comprehensive grasp of Microsoft 365, encompassing the skills to configure, manage, and resolve issues related to components such as OneDrive, Teams, SharePoint, and Exchange.
- Skilled in addressing issues, conducting analysis, and fixing printers and desktops, in addition to demonstrating competence in fulfilling various general server administration tasks.

Language Skills:

Fluent in English and French
