Information Technology Specialist

Preventing Sophisticated Cyber Attacks

Sustain cybersecurity best practices and protect companies from hardware and software attacks. Ensure organization software is up-to-date and monitor networks for potential threats or security risks. Educate employees in other departments about potential vulnerabilities and effective avoidance strategies.

Technical Skills

Platforms:	Windows Server 2012R2, Windows XP / 7 / 8.1 / 10, Linux Ubuntu / RedHat
Windows Server:	Active Directory Domain Services, AD Rights Management Services, DNS, DHCP, Workplace Join, NTFS File Permissions, Dynamic Access Control, NMP, Remote Access and Provisioning (SSH, Telnet, SFTP, FTP, TFTP, HTTP)
Networking:	Cisco Switches and Routers, Fortinet Switch, Sophos Switch, Firewalls, Subnetting, VLANs, VPN, Routing with Various Protocols such as: RIPv2, OSPF, EIGRP, Wireless Encryption and Security
Virtualization:	Microsoft Hyper-V, VMWare Workstation
Identification Access Management:	CyberArk, Splunk SIEM, SailPoint Enterprise
Scripting:	Basic Knowledge of PowerShell and Python

Professional Experience

WEIR CANADA, Ottawa, ON

Oct 2023 – Sept 2025

Information Systems Security Analyst

- Assessing existing computer systems for security issues and risks.
- Creating and verifying security plans with third-party vendors.
- Assessing and testing any new software and technology for Canadian Armed Forces.
- Setting security levels of software implemented on the Canadian Armed Forces war ships.
- Provides testing and evaluation services to support the Naval material for Canadian Armed Forces in the following areas:
 - Information and Communication System.
 - Marine System.
 - Combat and Control Systems
 - Testing and Infrastructure Support

BANK OF CANADA, Ottawa, ON

May 2022 – Sept 2023

Cybersecurity Analyst

- Monitored dormant accounts of bank employees, preventing hacker access.
- Participated in security training on technology safety, assisting company and coworkers with good privacy practices.
- Identified and logged software solution defects for developer fixes, avoiding threat actors leveraging vulnerabilities.
- Wrote test cases and strategy on SailPoint Enterprise, as required.
- Performed manual Integration, regression, system testing, and data validation using SailPoint.
- Determined risk of information breaches through evaluation of company database security.
- Ensured user access had required permissions, preventing misuse of unauthorized credentials.

NOVA NETWORKS, Ottawa, ON**May 2020 - April 2023****Security Operations Centre (SOC) Analyst**

- Run regular computer and software upgrades, providing vulnerability-safe environment.
- Reviewed vulnerability assessment results on covalence, delivering specific guidance to infrastructure and development personnel.
- Took quick action during incident response alerts as on-call engineer, stopping 99% of suspicious activities from doing damage.
- Stayed up to date on security trends and standards, enhancing job knowledge and value-add.
- Installed firewalls in company computers, increasing security and preventing information breaches.
- Implemented firewall policies on Forti manager, hardening system against threat actors getting in.
- Analyzed incoming and outgoing traffic on Forti analyzer, confirming traffic flow proceeded as implemented.

NOVA NETWORKS, Ottawa, ON**July 2018 – April 2020****Technical Support Engineer**

- Responded to incidents in a timely and professional manner.
- Created and maintained system backups and data recovery solutions.
- Resolved hardware, software, and applications problems for improved user productivity.
- Monitored system performance and implemented upgrades as needed.
- Deleted, created, and managed user accounts and privileges using Active Directory.
- Diagnosed network problems, running ping tests and traceroutes to isolate sources of issues.
- Developed training materials and procedures and trained users in proper use of hardware and software.

Education**Cybersecurity Diploma, Willis College of Business and Technology, Ottawa, ON****Jan 2021 – May 2022**

- Cyber Security Foundations and Secure Administration
- Secure Network Infrastructure and Defense
- Cyber Threat Analysis and Counter Measures
- Cyber Security Analyst Professional Development
- Ethical Hacking, Penetration Testing, Blue Team & Red Team
- Windows Server Security (Core Infrastructure and Active Directory)
- Network Security and Unified Threat Management
- Network Architecture Design and Operations
- Computing Hardware and Host Based Security
- Network Security Technology Routing and Switching
- Windows Application Security (Messaging Services and Database)
- Linux System Administration and Security
- Sophos Unified Threat Management
- Fortinet Unified Threat Management
- Cyber Security Threat Analysis
- Co-op (Bank of Canada)

Master of Arts (MA), Electronic Business Technology, University of Ottawa, Ottawa, ON

- Electronic Business Process Engineering
- Enterprise Resource Planning Management
- Systems and Architectures

Bachelor of Science (BSc), Honours, Information Technology, Limkokwing University, Cyberjaya, Kuala Lumpur, Malaysia

- Java Programming
- C++ Programming
- Systems Network Architecture
- Systems Security
- Database Systems
- Software Project Management
