PROFESSIONAL EXPERIENCE

OpenCircle MCSA

Desktop Support Technician

Full-time, Permanent

March 2025 - November 2025

- Delivered on-site and remote technical support for ~60 end users, maintaining 95%+ first-response SLA compliance and minimizing business downtime.
- Standardized workstation builds, peripherals, and desk configurations across 100+ devices, reducing setup and troubleshooting time by 30%.
- Led the implementation and organization-wide rollout of a password management solution for 100% of users, raising the password complexity for the whole company.
- Planned and executed the upgrade of 50+ workstations to Windows 11, completing the deployment on schedule with minimal disruption to operations.
- Managed procurement of IT hardware, software, and supplies through multiple vendors, supporting 100+ endpoints while improving cost efficiency.
- Automated user onboarding and offboarding using PowerShell scripts, reducing account provisioning time by 50% and improving security compliance.
- Coordinated with internal stakeholders and third-party vendors to deliver large-scale IT implementations on time and within scope.
- Maintained, upgraded, and optimized office technology, improving system reliability and reducing recurring technical issues by 25%.

TEKSystems

Endpoint Analyst I

Full-Time, Temporary

November 2024 - March 2025

- Supported a high-volume endpoint environment by assisting with mass workstation deployments, project initiatives, and an average of ~30 ServiceNow tickets per day.
- Deployed 300+ workstations using Microsoft Intune and Windows Autopilot, ensuring standardized configurations and rapid user readiness.
- Provided technical support for a wide range of endpoint devices, including desktops, POS systems, printers, and mobile phones.
- Assisted with multiple IT projects, including meeting room technology setups, printer deployments, and peripheral installations.
- Conducted on-site site visits to perform hardware inventory audits, asset verification, and hands-on technical support.
- Collaborated with cross-functional IT teams to resolve endpoint-related incidents and service requests within ServiceNow, maintaining SLA targets

Kingston Ross Pasknak LLP

IT Help Desk Technician

Full-Time, Permanent

December 2022 - August 2024

- Reduced total ticket volume by 90% and recurring tickets by 75% by developing and delivering staff training seminars to improve baseline technical knowledge and self-troubleshooting skills.
 - Implemented a new workstation imaging standard, streamlining deployments and significantly improving support workflow efficiency.
 - Supported the migration from on-premises Exchange to Microsoft 365, assisting with user readiness and post-migration support.
 - Automated user onboarding and offboarding within Active Directory using PowerShell, reducing onboarding effort by 80% and enabling immediate offboarding actions.
 - Coordinated hardware lifecycle refreshes, including device replacements and secure data transfers, minimizing user downtime.
 - Overhauled knowledge base documentation, making procedures clearer and more accessible for less technical staff.
-
