Work Experience

Freelance Cloud & DevOps Engineer— Remote

Apr 23 – Present

- Consulted for various startups and SMBs, designing and deploying cloud infrastructure solutions on AWS, Azure, and GCP.
- Led cloud migration projects, moving on-prem systems to the cloud and optimizing them for cost, security, and performance.
- Implemented continuous integration/continuous delivery (CI/CD) pipelines using Jenkins, GitLab CI, and GitHub Actions.
- Built infrastructure as code (IaC) using Terraform and CloudFormation, automating deployments and resource management.
- Collaborated with development teams to ensure scalable and secure solutions while improving the overall application lifecycle.

Cloud Software Engineer

Syntronic Research and Development — Ottawa

Jan 22 – Mar 23

- Architected and developed scalable, secure, and high-availability cloud-based applications for clients across various industries.
- Led the design and deployment of cloud infrastructure on AWS, utilizing services such as EC2, S3, Lambda, and RDS to build cost-effective and efficient solutions.
- Implemented containerized applications using Docker and orchestrated microservices with Kubernetes, improving deployment cycles and reducing operational costs by 20%.
- Spearheaded the implementation of CI/CD pipelines with Jenkins and GitLab, automating testing, integration, and deployment processes, which resulted in a 40% increase in development speed.
- Collaborated with cross-functional teams to design and implement security measures, such as IAM roles and policies, ensuring that all cloud services are compliant with industry standards.

- Developed and maintained cloud infrastructure using Infrastructure as Code (IaC) with Terraform and CloudFormation, enabling version-controlled and repeatable infrastructure provisioning.
- Worked directly with stakeholders to gather requirements, and delivered solutions within tight timelines while maintaining a high level of quality and scalability.

Senior DevOps Engineer

Blockchain Mind Inc — Remote

Sept 21 – Dec 21

- Managed and scaled cloud infrastructure using AWS, focusing on blockchain technology deployment, security, and optimization.
- Designed and implemented automated pipelines for building and deploying smart contracts and blockchain nodes, improving release cycles.
- Leveraged Terraform and Ansible for IaC, significantly reducing manual configuration and improving deployment consistency.
- Worked closely with developers to implement and optimize containerized applications with Docker and Kubernetes, reducing operational overhead.
- Automated routine operational tasks such as scaling, backups, and patch management to ensure system uptime and security.

DevOps Engineer

CGI Inc — Bell Canada

Dec 20 – Aug 21

- Developed and maintained CI/CD pipelines with Jenkins, ensuring seamless integration and deployment for enterprise applications.
- Managed and optimized cloud infrastructure (AWS and Azure), focusing on cost-saving measures while maintaining performance and scalability.
- Automated system provisioning and configuration management with Ansible and Terraform, improving efficiency and reducing errors.
- Designed and implemented Kubernetes clusters for container orchestration, ensuring efficient scaling and high availability of applications.

DevOps Consultant

BC Forward Solutions — Surrey, BC

Jul 20 – Nov 20

- Provided DevOps consulting to clients in diverse industries, helping them implement cloud solutions, automate workflows, and improve system performance.
- Implemented version control and release management processes using Git and Jenkins, improving collaboration between development and operations teams.

- Optimized infrastructure using AWS, reducing operational costs by automating scaling and resource allocation based on demand.
 - Integrated monitoring and alerting tools, improving system reliability and reducing downtime by proactively identifying and addressing issues.
 - Designed and automated backup strategies, improving data redundancy and recovery time objectives (RTO).
-

Education

Canadore College, Scarborough, Canada (2018 – 2019)
Project Management in Information Technology

Fanshawe College, London, Canada (2018)
Information Security Management

Jawaharlal Nehru Technological University, India (2015 – 2017)
Masters in Computer Science

Osmania University, India (2011 – 2015)
Bachelor of Engineering: Information Technology

Technical Skills

- **Operating Systems:** Linux, Windows
- **Tools:** Terraform, Kubernetes, Docker, Jenkins, Git
- **Cloud:** AWS (EC2, S3, Lambda, RDS), Azure, GCP
- **Databases:** PostgreSQL, MongoDB, DynamoDB
