NETWORK/IT ANALYST

IT professional with over 5 years of MSP experience designing and managing secure network infrastructures and automating enterprise IT systems. Skilled in optimizing uptime, improving endpoint protection, and integrating cloud-based security across 150+ devices. Adept at bridging technical solutions with business needs in complex, multi-client environments.

KEY COMPETENCIES

Network & Security

- Building and managing Layer 2/3 networks, VLANs, and VPNs
- Firewall setup (Palo Alto, Cisco, Fortinet, etc.), policy management, and MFA (Azure MFA, DUO)
- Endpoint protection and threat response

Cloud & Endpoint Management

- Microsoft Entra and Intune, ABM, and Mosyle MDM administration
- Cloud migrations, device management, and conditional access setup

Automation & IT Administration

- Windows Server and Active Directory management
- LogicMonitor for alerts and system monitoring
- PowerShell scripting to automate and streamline support tasks

Project & Client Support

- Infrastructure upgrades and client migrations for MSP environments
- Coordinating cross-team integration projects and client support initiatives

PROFESSIONAL EXPERIENCE

Smartlayer Business Solutions

Oct 2021 - Present

Network/IT Analyst

- Designed and deployed a secure Layer 2 network that improved stability for 100+ users and cut support requests by over 30%.
- Automated alerting and monitoring for 50 client environments using LogicMonitor, reducing manual checks and accelerating incident response.
- Configured and managed firewalls, tightening client security and preventing repeated breach attempts.
- Migrated client environments from on-premises Active Directory to Entra and Intune, streamlining identity management and access control.
- Implemented secure VPN access for 25 clients, enabling efficient remote connectivity and reducing dependency on on-site hardware.

EDUCATION

SAIT Polytechnic

Sep 2018 - Apr 2020

IT Computer Systems Major

- Graduated with Honours (3.96 GPA) | Jason Lang Scholarship Recipient
- **Capstone Project:** Developed a credential management platform that gave IT admins secure, centralized access to user environments with automated login—reducing access setup time by 60%.
