Professional Summary

Security professional with a strong mix of SOC operations, cloud security, GRC support, and hands-on engineering work. Skilled at strengthening systems, improving access controls, running investigations, and guiding teams through security standards. Known for adapting fast, spotting risks early, and helping organizations tighten security without slowing down operations. Comfortable working across infrastructure, cloud environments, and compliance programs while supporting both technical and non-technical teams.

Skills

- SOC 2
- ISO 27001
- FedRAMP
- SOX
- GDPR
- HIPAA
- Technology Controls Testing & Risk Assessments
- Identity & Access Management
- Audit Support & Evidence Collection
- Incident Resolution & Troubleshooting (IAM/AD/365)
- Vulnerability Assessment & Remediation
- Security Operations (SIEM, Monitoring, Alerts)
- Risk Analysis & Prioritization (CVSS, NIST, OWASP)
- Threat & Incident Response Support
- Patch & Configuration Management
- Cloud & Endpoint Security
- Security Awareness & Compliance Support
- Security Monitoring and Event Analysis
- AWS, Azure
- Patch and Vulnerability Management
- Policy & Procedure Development
- Audit Preparation & Evidence Gathering
- Sentinel, Splunk
- Identity & Access Management
- Process Improvement & Documentation
- Security Awareness & User Training.

Work Experience

Cybersecurity Analyst

CaribbeanOS INC | January 2024 – September 2025 | Toronto, ON

Responsibilities:

- Monitored server logs, firewall logs, SIEM alerts and IDS events to identify unusual activity
- Supported investigations by analyzing network traffic, endpoint alerts, and authentication patterns
- Managed vulnerability findings, validated results, and guided system owners through remediation steps
- Reviewed access rights and ran monthly account audits for IAM hygiene
- Helped deploy and maintain firewalls, antivirus, and endpoint protection systems
- Assisted in policy updates for security controls, access requirements, and secure configuration standards
- Ran routine health checks on security tools and helped coordinate fixes with infrastructure teams
- Prepared incident summaries and supported on call duties when needed.

Cyber Security Consultant

DataVox | May 2020 – Nov 2022

Responsibilities:

- Supported customers with security assessments, including policy reviews, risk scoring, and remediation plans
- Ran internal vulnerability scans, validated findings, and explained impact and fixes to clients
- Helped perform vendor security evaluations for outsourced tools and cloud services
- Reviewed firewall, system, and network configurations against industry standards
- Helped design updated access control procedures for multiple environments
- Assisted clients with SOC 2, ISO 27001, and NIST CSF preparation, including documentation and control mapping

- Advised teams on improving logs, detection visibility, and secure deployment practices.
- Provided guidance on threat mitigation, governance, and continuous improvement for cybersecurity frameworks.

IT Security Support Analyst

DEO360 Solutions | Jul 2018 – Feb 2020

Responsibilities:

- Supported daily security requests from staff, including access troubleshooting and endpoint issues
- Monitored basic security alerts and escalated confirmed threats to senior analysts
- Installed patches, updated antivirus tools, and applied hardening steps to servers and devices
- Helped with onboarding and offboarding tasks including account setup and permission reviews
- Ran routine system checks to confirm compliance with internal standards
- Assisted in documenting processes, incident notes, and security instructions for end users
- Supported network and system teams with ticket triage and technical tasks.

Education

Post Graduate Diploma: Cybersecurity

Sault College of Applied Arts and Technology, Toronto Campus

Master of Science: Information Technology Management

Binary University of Management & Entrepreneurship

Bachelor of Science: Computer Science

Binary University of Management & Entrepreneurship

Certifications

ISC2 - **Certified in Cybersecurity (CC)**

CompTIA - **Security+**
