

SUMMARY

Technical deployment specialist with 3 years at Solink, promoted from intern to Senior Support Technician Representative. Proven ability to coach peers, resolve escalated deployment issues, and improve processes through automation and cross-team collaboration.

WORK EXPERINCE

Senior Support Technician Representative | Solink

April 2025 – Present

- Diagnosed and resolved advanced system integration issues (QTS, Ngrok, network scans, tcpdump, advanced NVR/camera tools)
- Designed a prototype internal automation tool using webhooks, Slack, and Intercom flowcharts to streamline install distribution workflows and improve team communication efficiency
- Authored and maintained deployment of playbooks to streamline site configurations and troubleshooting processes
- Collaborated with cross-functional teams (PMs, Sales Engineers, Support) to eliminate roadblocks and optimize deployment timelines
- Acted as a technical advisor for multi-location rollouts, aligning plans with customer requirements
- Led peer coaching and guided Tier I technicians in deployment best practices and technical escalation strategies
- Investigated backend systems, interpreting logs and using diagnostic tools to solve edge-case deployment issues
- Coordinated with IT teams and third-party installers on complex POS, NVR, and camera integration cases
- Maintained high SLA compliance and reduced repeat deployment issues through proactive problem-solving
- Proposed and piloted improvements to internal tools and deployment workflows, influencing broader process changes
- Ensured security compliance and data handling per Solink and Canadian standards
- Maintained flexibility in shift work (evenings/weekends) to support deployments across multiple time zone

Deployment Support Technician Tier I | Solink

March 2023 – April 2025

- Developed a strong understanding of Solink's backend system, QNAP configurations, and troubleshooting, ensuring efficient deployments and prompt issue resolution
- Configured and troubleshot various NVRs, DVRs, encoders and cameras, guaranteeing seamless installations and optimal system configurations for clients
- Successfully completed a high volume of installs daily, ranging from simple to complex setups, including POS integrations and speaker configurations, while upholding high-quality standards
- Demonstrated high efficiency in completing tasks, consistently meeting or exceeding daily output targets
- Leveraged the latest tools and best troubleshooting practices to complete installations quickly and effectively, reducing downtime and improving service quality
- Collaborated with Project Managers to provide clear, concise communication about any deployment issues or roadblocks, ensuring timely resolutions
- Took ownership of technical roadblocks by coordinating with IT to ensure fast, uninterrupted installations.
- Demonstrated a deep understanding of Solink's services, aligning technical configurations with customer needs and consistently ensuring excellent customer satisfaction
- Delivered exceptional customer service by addressing concerns promptly and providing innovative solutions during installation and setup

Deployment Process & Implementations Intern | Solink

Jan 2023 – March 2023

- Collaborated with internal teams to troubleshoot, resolve, and ensure completion of various sites
- Implemented procedures, including Linux scripts, to improve the speed & efficiency of the deployment process

- Conducted quality assurance for installed sites ensuring all sites aligned with client/company standards
- Specified region of interest (ROI) of alarm cameras through the Solink platform
- Configured various settings within QTS (including, DNS gateway, Ngrok removal, time zone updates, and SMTP file downloads) to complete Closeouts and Arming & Angling sites
- Performed various tasks (i.e. set bitrate retention, change external IP address, data integration, data source, set location groups, marking and tagging registers, and updating and resolving dnsmasq) to complete site closeouts
- Assisted in a special project aimed at developing a troubleshooting procedure to address missing QND door contacts and implementing different potential solutions to resolve the ongoing problem

EDUCATION

Electrical Engineering Technologist

Jan 2019- Dec 2021

Algonquin College

Associate Member of OACETT working towards C.E.T

PROFICIENT SKILLS

- **Programming & Scripting:** Python, C, SQL, Bash
- **Support Tools:** Microsoft Office, Smartsheet, HubSpot, Intercom, Jira, EZ Tools, SADP Tools
- **Networking & Tools:** Cisco Networking, Wireshark, Command Shell, QTS, Ngrok, WinSCP
- **Soft Skills:** Team Leadership, Coaching & Mentorship, Escalation Management, Cross-Functional Collaboration, Strategic Problem Solving, Time & Priority Management
- **Hardware & Systems:** PC Assembly, CCTV Systems, NVR/DVR, Gilbarco POS, Verifone Terminals, Ruby 2
