

Evan Lane

Charlottetown, PE, Canada | (902) 330-0815 | evan.james.lane@gmail.com | [linkedin.com/in/ejlane](https://www.linkedin.com/in/ejlane)

PROFESSIONAL SUMMARY

IT Infrastructure leader with 10+ years architecting secure, scalable systems across Cybersecurity, networking, database administration, and cloud infrastructure. Proven track record leading modernization initiatives, founding Security Operations Centers, and transforming reactive teams into high-performing units. Seeking leadership roles to drive operational excellence and team development.

PROFESSIONAL EXPERIENCE

IT Infrastructure Administrator

Workers Compensation Board PEI | Charlottetown, PE | Jan 2024 – Present

- Delivered complete application modernization in 2 months after identifying critical Windows Container architecture failures, securing stakeholder buy-in for Linux migration, and rebuilding environment that stalled for 2+ years under contractor team
- Modernized decade-old tech stack (.NET 2.2/Node 10/Angular legacy) to current LTS versions (.NET Core 8/Node LTS) on Linux containers, hand-compiling Docker images from source after vendor deprecation of Windows container support
- Architected Azure DevOps environment with automated CI/CD pipelines and GitOps workflows, reducing infrastructure deployment times by 75% (20 minutes to 3-4 minutes) and enabling rapid iteration for cross-functional development team
- Resolved chronic infrastructure performance issues by replacing aging spinning disk SAN with an all-flash NVMeOF array, increasing IOPS by 10-15x and reducing VM boot times from 5+ minutes to under 30 seconds.

IT Manager

Island Abbey Nutritionals | Charlottetown, PE | Jan 2022 – Apr 2023

- Uncovered \$600,000 in annual MSP overcharges through systematic audit of contracted services vs. actual deliverables, building evidence-based case of NOC/SOC/infrastructure management failures that drove contract renegotiation from \$750K to \$150K (80% reduction) with strengthened accountability
- Upgraded IT infrastructure from mixed consumer-grade components to unified Cisco Meraki SDN across manufacturing facility, implementing centralized asset inventory, structured cabling organization, and device lifecycle management for 50+ endpoints
- Established IT security and compliance framework from scratch, implementing Microsoft/CISA benchmarks via Intune, migrating legacy servers to cloud, and supporting FDA/CFIA regulatory audits for food manufacturing operations
- Deployed facility-wide WiFi enabling mobile operations in large manufacturing environment and integrated Power Apps with IoT/PLC/HMI systems to automate production tracking and quality statistics

Senior Information Technology Consultant

Maximus Canada | Charlottetown, PE | May 2021 – Dec 2021

- Delivered critical infrastructure modernization as contract backfill, implementing Hybrid Intune enrollment for 75 devices to enable centralized management.
- Conducted security audit across multi-platform environment (Windows Server, Ubuntu, CentOS, Hyper-V, NetApp SAN, Checkpoint NGFW), remediating identified vulnerabilities.

Cyber Security Consultant

Amsted Rail | Charlottetown, PE | Jun 2020 – Sep 2020

- Led Cisco SecureX platform integration as founding SOC member, building enrollment templates and procedures to unify security infrastructure (Meraki, Catalyst, Firepower, endpoints) across 5 manufacturing subsidiaries, completing Canada rollout and 2 of 5 company deployments
- Deployed enterprise IAM framework with Duo MFA/SSO across 5,000+ users in multiple subsidiaries, coordinating with local IT teams to integrate critical business systems.
- Established centralized security monitoring framework enabling single SOC team to detect threats and coordinate remediation across previously siloed US/Canada operations, integrating OT/IT infrastructure and CASB tools for unified visibility

Senior Network Administrator

MAXIMUS Canada | Charlottetown, PE | Aug 2018 – Dec 2019

- Revolutionized workstation imaging through automation, reducing deployment from 8+ hours to 30 minutes and saving 450+ IT labor hours annually across 60+ workstation deployments
- Led cultural shift from reactive to proactive IT through structured scrums and Kanban workflows.
- Architected and deployed 3-host production cluster (16-core, 1.4TB RAM, 32Gb FC, 10Gb dedicated cluster backplane) with N-1 redundancy, separating 50+ production VMs from development environment and eliminating single points of failure with zero downtime migration

Database Administrator

Invesco Ltd. | Sep 2017 – Aug 2018

- Led database testing and validation for Solaris-to-RHEL/Windows migration across dozen databases, reducing critical overnight batch processing from 8+ hours to sub-business-day completion and DR environment refresh times from 4-5 hours to 1 hour per environment
- Orchestrated month-long pre-migration testing cycle, scripting and troubleshooting stored procedures, coordinating with enterprise database team on version control, and providing weekend cutover support to resolve deployment issues before Monday operations

TECHNICAL SKILLS

Infrastructure & Cloud: Windows Server, Linux (RHEL/Ubuntu), VMware, Hyper-V, Azure, Oracle Cloud, GCP

Security & Networking: IAM/SSO/MFA, Checkpoint, FortiNet, SIEM, Cisco, Aruba, BGP, SDN

Database & DevOps: MS SQL, Oracle DB, MySQL, Azure DevOps, CI/CD, GitOps, Docker, PowerShell, Ansible, Terraform

EDUCATION

B.A., Applied Communication, Leadership and Culture | **University of Prince Edward Island** | 2026

Diploma, Computer Network Technology | **Holland College** | 2016
