Professional Summary

Detail-oriented and analytical cybersecurity professional with 2 years of experience as an IT System Analyst, bringing a solid foundation in network systems, system monitoring, and vulnerability assessment. Proven ability to support IT infrastructure, troubleshoot system issues, and assist in implementing security measures. Adept at collaborating with cross-functional teams to identify and resolve potential security threats. Eager to leverage IT experience and growing cybersecurity expertise to protect organizational assets and contribute to robust security frameworks.

Technical Skills:

- Windows 10/11, MacOS, Linux
- Active Directory & Group Policy
- Networking: TCP/IP, DNS, DHCP, VPNs, Firewalls
- Cloud Platforms: AWS, Microsoft Azure
- Vulnerability Assessment & Management: Nessus, OpenVAS
- Network Security Monitoring: Wireshark, Zeek
- Threat Intelligence Analysis: MISP, ThreatConnect
- Security Information and Event Management: Splunk, Microsoft Sentinel
- Identity and Access Management: Okta, Azure AD, AWS IAM, SSO
- Endpoint Protection: CrowdStrike Falcon, Sentinel One, Microsoft Defender for Endpoint, Sophos Intercept X
- Security Monitoring: Firewall Configuration(Sophos, Fortinet, WatchGuard), VPNs, SSL/TLS, Multi-factor Authentication.

Work Experience

Systems Analyst

F12.net/Dynamix Toronto, ON

Nov'2023-Present

- Investigated end-user workstations for malware and indicators of compromise (IOCs) using tools such as Malwarebytes and CrowdStrike Falcon.
- Performed initial triage on potentially infected systems by analyzing suspicious activity, running scans, and collecting endpoint data.
- Assisted the security team in remediating infections by isolating compromised machines, removing malware, and verifying system integrity post-remediation.
- Communicated findings and coordinated closely with cybersecurity personnel to ensure timely containment and resolution of threats.

- Assisted the IT support team with ticket dispatching by triaging incoming requests and assigning them to appropriate technical teams based on priority and issue type.
- Monitored server alerts and system notifications, escalating critical issues to the appropriate teams to ensure timely resolution and minimize downtime.
- Managed a high volume of client support requests daily, ensuring timely resolution while maintaining high customer satisfaction.
- Prioritized and organized tasks effectively to meet service level agreements (SLAs) in a fast-paced IT support environment.
- Demonstrated strong time management by balancing multiple tickets and follow-ups, reducing backlog and improving response times.
- Utilized organizational tools and ticketing systems (ServiceNow, ConnectWise) to track progress, document resolutions, and ensure efficient workflow management.
- Maintained clear communication with clients, setting expectations and providing timely updates throughout the support process.
